

All the power you need  
at a price you can afford.

# Extensa®

Family of Notebook Computers

# Extensa<sup>®</sup> family of notebooks

*No other company packs so much power  
in such an affordable package.*

*As an on-the-go manager, small business owner or frequent flyer, the affordable Extensa 660 and 610 notebooks give you all the power you need to work at the office or on the road. But, make no mistake about it. These notebooks are no lightweights when it comes to features. Every Extensa comes with the capabilities you need most. So you're not paying for technology that isn't important to getting the job done. Whether you're using a notebook in the office or on the road, Extensa notebooks are clearly one step ahead of their class.*

The Extensa 660, sporting a fast 166MHz Intel<sup>®</sup> Pentium<sup>®</sup> processor with MMX<sup>™</sup> technology, offers you full multimedia capabilities. And MMX technology lets you take full advantage of them, with smoother, more realistic video and richer Internet content. With a modular bay, the Extensa 660 gives you the option of using a high-speed CD-ROM drive, floppy disk drive, or both. This bay can also support an extra Lithium ion battery, making it a flexible, powerful solution.

If affordability is a priority, you'll be astounded at the features we've packed into the Extensa 610 series.

*Extensa Model 660 CDT*

As well as its 150MHz Intel Pentium processor, the Extensa<sup>™</sup> 610 is available with an 11.3" active matrix TFT high-resolution screen for clear, crisp text and colors. Add to that multimedia capabilities such as 16-bit stereo sound, dual speakers, a 10X CD-ROM, 1 MB video memory and Zoomed Video support, and your notebook presentations have never looked or sounded better.

## **Extensa notebooks come with room to grow.**

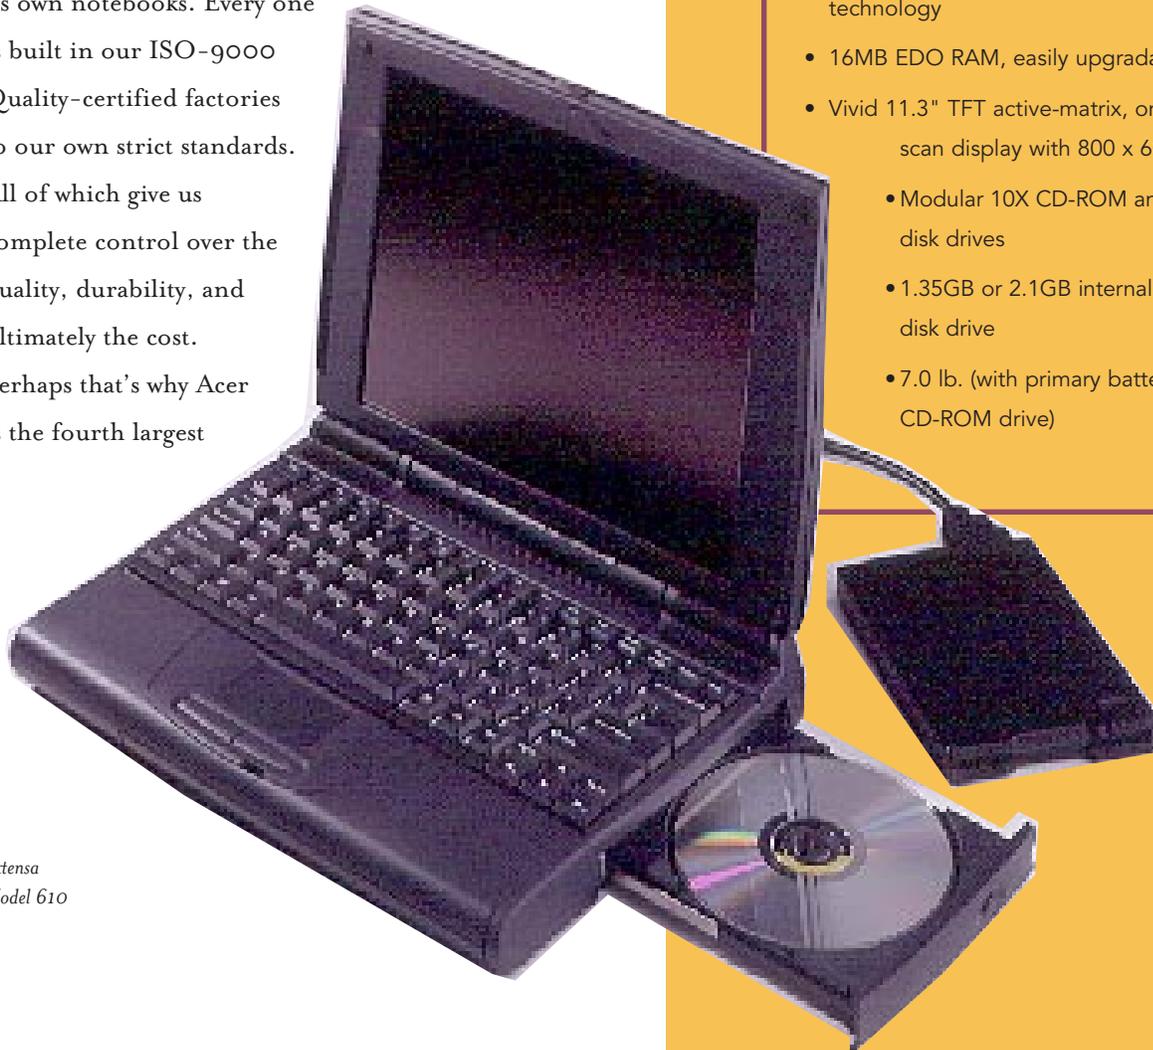

It's a simple fact. Computing needs change. Businesses grow. Software releases demand more of your system's resources. With the Extensa, upgrading is easy. Memory can be expanded up to

64MB. The two PC card (Type II) slots let you add different types of functionality like fax/modem capabilities, network connectivity, or additional storage. And, since the Extensa comes pre-loaded with helpful software, you can be productive right from the start.

**Quality you can trust.**

Serious notebook technology that makes business sense.

When you're looking for more features for the money, there's something you should know. Acer designs, develops and manufactures its own notebooks. Every one is built in our ISO-9000 Quality-certified factories to our own strict standards. All of which give us complete control over the quality, durability, and ultimately the cost. Perhaps that's why Acer is the fourth largest

Extensa  
Model 610

## Extensa

### key features
