Do more with wireless communications

Making connections is an essential part of doing business. The TravelMate 610 is designed with this in mind, ensuring that usershave a range of connectivity options in any environment. These include state-of-the-artintegrated wireless LAN, as well as a built-in 10/100 Mbps Fast Ethernet connection.

Take control with superb portability

Enterprises and clients demand nothing but the best from those who work for them, so the modern professional must be in control at all times. Acer's TravelMate 610 offers the performance and functionality these users expect, combined with the portability they need to stay ahead of the game.

Measuring just 1.0"/24.5mm and weighing as little as 4.5 lb/2.0kg, the TravelMate 610 is thin and light enough to be carried to any business meeting. Its sleek and stylish design presents an image of professional efficiency, while its sturdy magnesium alloy casing, combined with the data protecting DASP system, makes it ideally suited for life on the move.

Maintain security

The data security concerns of professional mobile users are addressed with the integrated smart card system, enabling users to lock the computer against unauthorized access, encrypt and decrypt files stored in the system, and manage on-line account information. Thus, sensitive business data is protected even if the TravelMate 610 is lost or stolen.

Perform at your best

Top-performing professionals expect the very best from the tools of their trade. Powered by the latest Intel® Mobile Pentium® III processors, the TravelMate 610 excels in all leading business applications. And with the Intel® 815EM chipset providing embedded video and audio, along with memory that's upgradeable to 512MB, users have a tool that meets all their needs, now and in the future.

The TravelMate 610's state-of-the-art DVD/CD-RW combo drive module offers incredible flexibility, saving valuable time and expense. What's more, the large capacity hard drive provides generous internal storage, while the integrated AcerMedia Bay supports hot swappable weight saver, DVD/CD-RW combo drive, 8x DVD-ROM, 24x (8/4/24) CD-RW, 20GB 2nd HDD and 2nd battery modules.

Ensuring users remain productive wherever they go, the TravelMate 610's slim battery lasts a respectable 2.5 hours between charges, with a super-fast recharge capability of just 1.5 hours. And for extended mobile use, an optional 2nd battery module fitted into the AcerMedia Bay provides an outstanding 5-hour mobile range.

Make no compromises

Providing superior portability without compromising efficiency or comfort, the TravelMate 610 boasts a large 14.1" TFT display offering XGA resolution. In addition, the FineTouch Keyboard, designed with a 5° curve, the scroll key-enabled touchpad and the programmable launch keys all promote increased productivity and greater ease of use.

And for maximum effect, users can deliver their best business presentations as they navigate through their slides using the optional InviLink™ Control and the TravelMate 610's frontal FIR port.
