

With the longest
lasting battery in the
business, you have
the power to go
anywhere, do anything.

TravelMate®

7000

The TravelMate 7000

*No other notebook
comes close to 7 hours of
power computing.**

Today, serious business users require more than a tuck-under-the-arm portable solution. They need the power and capabilities of a desktop to take on the road. Now they have one. The TravelMate® 7000, with a single battery lasting over 7 hours and a powerful Intel® Pentium® processor with MMX™ technology, is bringing that very level of speed and sophistication to mobile computing.

with docking station*

**The power to keep business
working. Around the country.
Or across the seas.**

You asked for a full featured notebook that lasts longer, and that's just what you'll find in the TravelMate 7000. Outlasting all other notebooks in its class, its Heuristic battery-management technology and lithium ion battery gives users the power to perform for as long as 7 hours (sometimes even longer). In other words, you could work through two in-flight movies with power to spare. Recharging the battery is quick too. With an AC adapter, its

**The only mobile computer that adapts
power usage for each individual user.**

intelligent control circuitry fully recharges the battery in a mere two hours, or four hours if users prefer to charge the battery while in use. But that's just part of the story. The TravelMate 7000 was also created to be used comfortably for hours on end. For starters, our new 12.1" TFT display is easy on the eyes. And the keyboard makes working more comfortable. The innovative design allows the keyboard to be raised and tilted to the angle of most desktop keyboards – so the keys are easy to see, and feel natural to use.

When it comes to performance, the first thing you'll notice is how well the TravelMate 7000 compares to the power of most desktop systems. With the new 166MHz Pentium processor with MMX technology (up to 64MB of RAM and an

7 hour battery life based on VeriTest, Inc. cross country test March 1997, running Windows 95.

internal 33.6Kbps modem), you'll find the speed impressive. Yet speed is only part of what the new Intel Pentium processor with MMX technology brings to the TravelMate 7000. With this new processor, the multimedia computing buff will experience smoother, more realistic video and richer Internet content. Not to mention an increase in system performance by 20% and multi-media performance by as much as 60%, depending on which application is running. Add to that the 16-bit stereo sound, dual speakers, a 10X CD-ROM (swaps out with a floppy disk drive), 128-bit PCI graphics accelerator supporting 30 frames per second and a 12.1" TFT active-matrix screen. You'll see a new, more vibrant way to display presentations, video, everything.

The power to grow and expand.

Because businesses grow and new software releases demand more and more from systems, the TravelMate 7000 is designed to accommodate

the most ambitious expansion plans. Memory can grow from 16MB or 32MB to 64MB using any combination of 8, 16, or 32MB in the DIMM sockets. The two PCMCIA slots let you add more functionality, including the ability to network with your office LAN using a PCMCIA card.

The perfect desktop replacement.

The DockMate III expands your options even further. Just snap in the TravelMate 7000 and you're on the fast track for an easy connection to peripherals like a keyboard, mouse, monitor, auxiliary speakers or a printer. Need to connect into the company network? The DockMate III's built-in Ethernet controller (10BASE-T) with a RJ-45 connector gives you instant access to an Ethernet-based LAN. Whether you're in the office, at home or on the road, you'll enjoy superior performance with the TravelMate 7000.

DOCKING SYSTEM KEY FEATURES

- Easy one-step connection
- Built-in 10BASE-T Ethernet with RJ-45 port
- 25-pin parallel port for printer
- 25-pin port for external floppy disk drive
- 9-pin serial port
- PS/2 mouse port
- PS/2 keyboard/keypad port
- External CRT port
- RJ-11 jack for modem
- RJ-11 jack for phone line
- Speaker/earphone-out jack
- Microphone-in jack
- Joystick/MIDI port
- Stereo line-in/out RCA jacks

The best value in notebook computing.

When you're looking for the utmost in system performance, affordability and reliability, there's something you should know. For over 20 years, Acer has been one of the few companies designing, developing and manufacturing its own systems. The TravelMate 7000 is no different. Unlike most computer companies that assemble parts from a variety of vendors, we design and build the TravelMate in our ISO-9000 certified factory to our own strict standards. All of which gives us complete control over the quality, durability, and ultimately the cost. That's why you see so much more value in every Acer system.

Acer customers are giving our support high marks, too. Starting with the warranty. Every TravelMate 7000 comes with a three-year Desk-to-Desk limited warranty.

TravelMate 7000

key features

- Lithium ion battery powers for over 7 hours (in smart power-management mode)*
- 166MHz Intel® Pentium® processor with MMX technology
- 256KB second-level sync SRAM cache memory
- 32MB RAM, upgradable to 64MB using EDO DIMMs
- PCI local bus video with 128-bit graphics accelerator
- 12.1" TFT active matrix display: 800 x 600 at 64K colors
- 1.2MB video memory
- 2.0GB enhanced IDE, 2.5" internal hard disk drive
- 1.44MB, 3.5" removable floppy disk drive
- 100-240v AC adapter
- 2-hour rapid battery charge; 4-hour charge while in use
- Two PCMCIA sockets (two Type-II, one Type-III)
- 10X CD-ROM drive interchangeable with floppy disk drive
- 16-bit stereo audio system with dual speakers and microphone
- 33.6Kbps modem with fax, speakerphone
- Ergonomic palmrest with centrally-located touchpad; tilt-up keyboard
- Weighs just 7.5 pounds, with battery
- 3-year Limited Warranty; Desk-to-Desk
- Microsoft® Windows® 95 preloaded

*Battery life expectancy requires Smart Power Management mode. Actual battery life may vary depending on usage and configuration. Based on VeriTest, Inc. cross country test March 1997, running Windows 95.

MMX technology is only one of the TravelMate 7000's

high performance features

- A new standard of power and performance with MMX technology
- The longest battery life, with over 7 hours of nonstop mobile computing
- Better sight, better sound for a better multimedia experience
- The ideal desktop replacement for business
- The most reliable, fully-featured notebook for the money

Generous 12.1" TFT active-matrix display for vivid color and easy viewing.

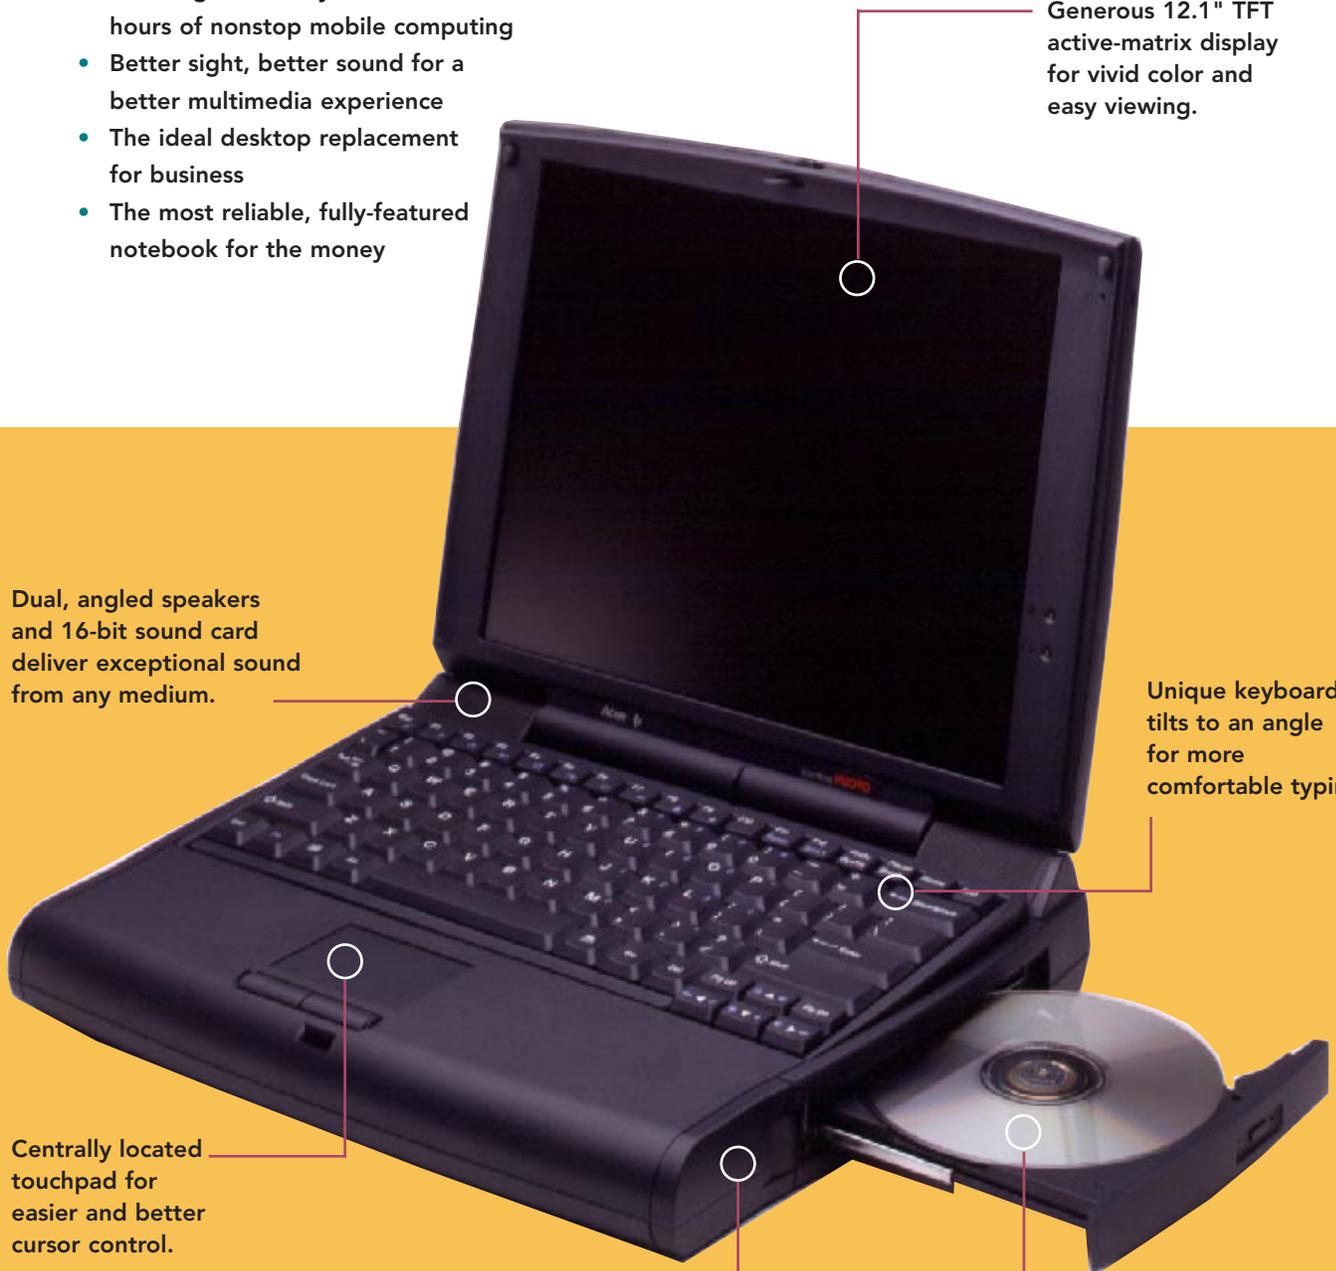

Dual, angled speakers and 16-bit sound card deliver exceptional sound from any medium.

Unique keyboard tilts to an angle for more comfortable typing.

Centrally located touchpad for easier and better cursor control.

Lithium ion battery with Heuristic power management delivers over 7 hours of power in Smart Power Management mode.

Interchangeable 10X CD-ROM/floppy disk port gives users optimal use and flexibility.
