

## ASCENTIA™ 800N & 500S ACCESSORIES

ASCENTIA™ 800N & 500S As

ASCENTIA™ 800N & 500S Asc

### MAKE THE MOST OF MOBILE COMPUTING

THE ASCENTIA 800N & 500S offer exceptional combinations of form, function and affordability. They're designed with you in mind, offering ingeniously engineered innovations that make the most of all their power.

**PCMCIA ENHANCEMENT CARDS** The Personal Computer Memory Card International Association set the standard for these credit card-sized expansion accessories, and AST offers several of our own for you to instantly expand your communications and connectivity capabilities.

**14.4 BPS CELLULAR DATA/FAX MODEM** Slip a data/fax modem into your PCMCIA expansion slot, and you can send or receive information from a fax machine or other computers. Online services are now at your

fingertips. This modem offers cellular capability with many popular cellular phones, too.

Software included.

### LAN ADAPTERS-ETHERNET 10 BASE 2, 10 BASE T AND TOKEN-RING

While back in the office, or on the road, you'll have quick network connectivity with our LAN adapters. Download information, share programs, or send/receive E-mail on your Ascentia notebook. Ethernet and

Token-Ring Cards include ODI and NDIS drivers for operation in Novell NetWare 2.x and 3.x. The most popular network drivers and user's manuals are also included.

**SCSI ADAPTER** Add multimedia capabilities so you can access databases now available on CD ROM. SCSI device drivers for CD-ROM devices from Hitachi, IBM, NEC, Panasonic, Sony, Toshiba and more, plus a user's manual are included.

**AUTOMOBILE ADAPTER AND AC ADAPTER** Plug your Ascentia into the cigarette lighter of your car to work on the road without draining valuable battery life. And though your Ascentia came with one AC Adapter, you may find it handy to have two — one for the office and one for travel. The auto adapter or AC adapter can also charge your battery in just 2.5 hours.

**BATTERY PACKS** Our extra nickel metal hydride (NiMH) battery packs are lightweight, small and environmentally friendly. The 800N is only 3.9" x 4.2" x .7" and .95 lbs. The 500S is just 10.4" x 1.6" x .8" and .96 lbs. Carrying extra batteries for extended use is easy.

**NUMERIC KEYPAD AND PS/2 KEYBOARD** Do a lot of number-crunching easily on the road, with a standard 10-key arrangement that packs away for easy, lightweight carrying. The full-size keyboard can make data entry more convenient back at your desk. Both are color-matched with the Ascentia 800N or 500S to attractively coordinate your entire workstation.

**CARRYING CASES** Our sleek and sophisticated leather and nylon briefcases not only protect your notebook or subnotebook in contemporary style, they include convenient compartments for all your accessories. These carrying cases are large enough to carry the notebooks as well as all your other materials, eliminating the need to carry a separate briefcase.

**340MB HARD DRIVE UPGRADES** For truly abundant storage capability, the Ascentia 800N and 500S hard drives can be upgraded to 340MB at an AST Authorized Service Center.

**MEMORY UPGRADES** Plug a simple module into the memory socket, and you can upgrade the system memory by 4MB, 8MB, or 16MB. They're great protection for your investment, because they allow your Ascentia to grow along with you.
