

COMPAQ SLT 386s/20 Personal Computer

The new COMPAQ SLT 386s/20 Personal Computer is the most powerful laptop ever designed by Compaq. Inside its lightweight chassis is a 20-MHz Intel 386SX microprocessor that gives you the power to blaze through the most demanding applications wherever you go. It also lets you take advantage of powerful applications through operating environments such as Microsoft Windows Version 3.0 and OS/2 Presentation Manager.

To make sure you can put all this power to good use, Compaq has packed the COMPAQ SLT 386s/20 with an array of features you'd be happy to find in a desktop PC. Features like VGA graphics, a high-performance fixed disk drive and the capability to use up to 14 megabytes of memory.

But when you consider that all this comes in a lightweight battery-powered package—well, we'll leave it to you to consider the full range of possibilities.

COMPAQ

Compaq made its name in portable computing and went on to become a world leader in 386 technology. So when it came to creating an extraordinary 386 laptop, we knew you'd have some extraordinary expectations.

The new COMPAQ SLT 386s/20 exceeds them all. Never before has this level of performance, desktop PC capabilities, and expandability been put into such a small space.

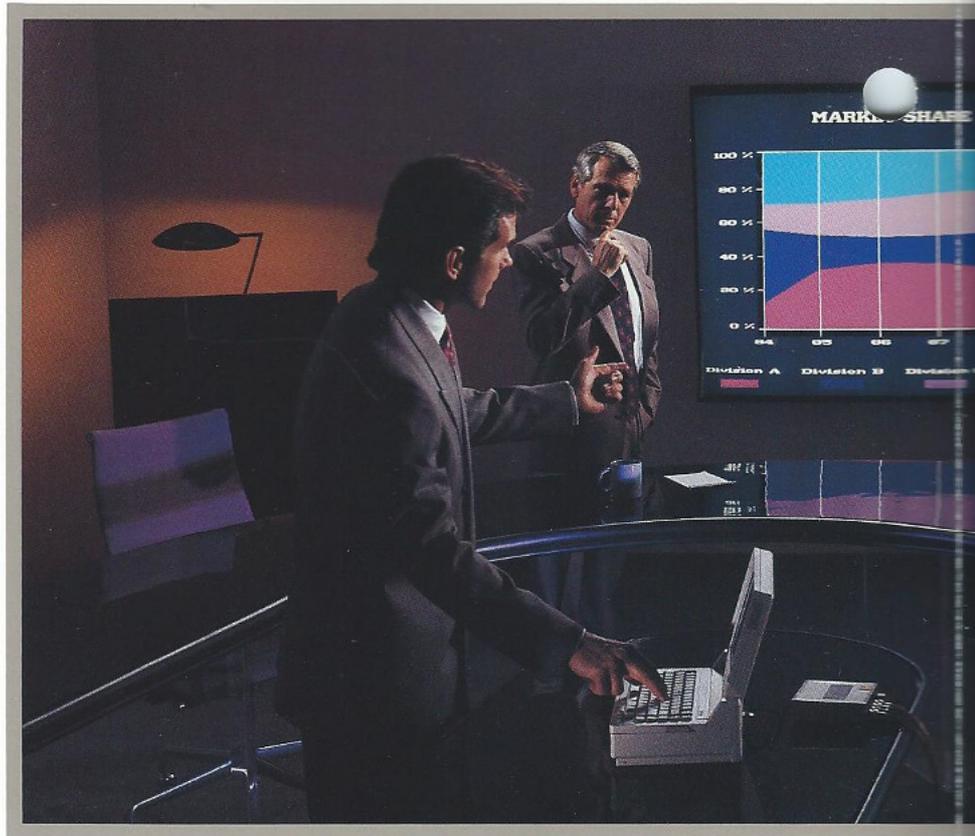

Never mind the size.

The COMPAQ SLT 386s/20 ends the difficult choice between performance and portability. Once and for all.

A 20-MHz 386SX microprocessor complemented by cache memory makes it nearly twice as fast as 12-MHz 286 portables and 50% faster than 16-MHz 386SX portables. This means you can run powerful new 32-bit software as well as existing software with astonishing speed.

Its efficient 4-Kbyte four-way set associative cache memory design outperforms non-cached PCs, delivering instant response to data requests up to 93% of the time. It even delivers superfast data access with a standard high-performance 120- or 60-Megabyte Fixed Disk Drive.

For demanding spreadsheets, business graphics and other numeric-intensive applications, an optional 20-MHz 387SX coprocessor pushes the speed limit even further.

Compaq packs more into a laptop

And an integrated 16-bit graphics controller delivers high-speed throughput for all of your graphics applications.

It's all in there.

The COMPAQ SLT 386s/20 offers an array of integrated features you'd expect in a desktop. So you won't have to step down in productivity while stepping up in portability.

Its two megabytes of fast-access memory is expandable up

The optional CD-ROM Adapter lets you plug in a third-party CD-ROM drive, giving you access to huge volumes of information on CD from a wide range of sources.

An optional Desktop expansion standard slots that let you add to your system for your particular application.

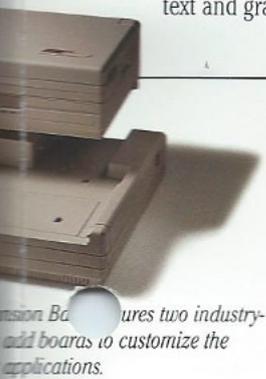

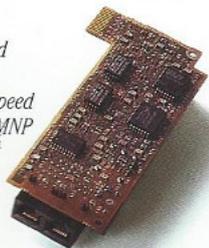

top computer than ever before.

to 14 megabytes. A 3 $\frac{1}{2}$ -inch Diskette Drive and a fixed disk drive are standard. You also have options to grow. You can plug in an external 5 $\frac{1}{4}$ -inch Diskette Drive or Tape Backup System. Or you can even add an external CD-ROM drive through an adapter.

A high-contrast backlit VGA antiglare screen displays text and graphics that are easy to read in any light. And its

The optional Enhanced 2400-Baud Internal Modem delivers high-speed data transfer through MNP Level 5, V.42bis or Hayes-Adaptive Data Compression.

Expansion Base features two industry-standard add boards to customize the applications.

keyboard offers the comfort of full-sized keys and standard spacing.

The COMPAQ SLT 386s/20 gives you the flexibility to transfer data with an internal modem, including the new Enhanced 2400-Baud Internal Modem. This modem features error control for data reliability and data compression for high-speed transfer.

You'll also find standard interfaces that let you work with the add-ons you need. And the optional Desktop Expansion Base can make the COMPAQ SLT 386s/20 at home in your office.

Ready for the road.

At 14 pounds, the COMPAQ SLT 386s/20 is small and light enough to go wherever you go. And like all COMPAQ portables, it's built to be rugged and reliable.

The rechargeable NiCad battery pack provides more than three hours of power, and it recharges automatically while you're running on AC power. You can even operate it from your automobile lighter with an optional adapter.

The power in portables.

Compaq is a world leader in building high-performance, high-quality portable personal computers. The COMPAQ SLT 386s/20 is another powerful example of our commitment to push the limits of portable PC performance, while maintaining industry-standard compatibility.

Specifications

Standard Models

Model 120:	Standard features listed with 120-MB Fixed Disk Drive
Model 60:	Standard features listed with 60-MB Fixed Disk Drive

Standard Features

Processor:	20-MHz Intel 386SX Socket for 20-MHz Intel 387SX coprocessor
System Architecture:	Industry Standard Architecture (ISA)
Memory:	2 MB standard Memory expandable to 14 MB
Cache:	4-Kbyte four-way set associative
Storage Devices:	3 1/2-inch 1.44-MB Diskette Drive 120-MB Fixed Disk Drive (average access time < 19 ms) 60-MB Fixed Disk Drive (average access time < 19 ms)
Interfaces:	Parallel Serial Enhanced Keyboard Desktop Expansion Base External Storage Module
Keyboard:	Detachable Full-size keys Standard spacing
Graphics:	VGA Backlit LCD 640 × 480 resolution 8 gray scales 10-inch diagonal
Security:	Power-on password
Warranty:	Full one-year limited warranty
Physical Specifications:	14 lb. (6.3kg) 4.1" H × 13.5" L × 8.5" D (10.54cm H × 34.29cm L × 21.59cm D)

Options

Coprocessor:	20-MHz Intel 387SX coprocessor
Memory:	1-MB Memory Expansion Board 2-MB Memory Expansion Board 4-MB Memory Expansion Board Memory expansion up to 14 MB
Storage Devices:	External 5 1/4-inch 1.2-MB Diskette Drive External 5 1/4-inch 360-Kbyte Diskette Drive External 80-/120-MB Tape Backup External 60-MB Tape Backup Attachable CD-ROM Adapter
Communications:	Enhanced 2400-Baud Internal Modem with data compression and error control (U.S. and Canada) 2400-Baud Internal Modem Serial Interface Board
External Graphics:	Advanced Graphics 1024 Board Advanced Graphics Color Monitor Video Graphics Color Monitor Video Graphics Monochrome Monitor
Power:	Backup Battery Pack Automobile Adapter
Software:	MS-DOS Version 3 and Version 4 as published by Compaq Microsoft OS/2 Standard Version 1.2 as published by Compaq
Additional Options:	Desktop Expansion Base External Numeric Keypad External Battery Charger Carrying Case Technical Reference Guide
