

## Compaq Tablet PC TC1000

# The ultramobile PC that adapts to the way you work

### Powerful Windows PC

The Compaq Tablet PC TC1000 is a full-function notebook PC delivering performance and compatibility in a fast-paced business environment.

- > Utilizes the power of Microsoft Windows XP Tablet PC Edition, a superset of Windows XP Professional – 100% Windows compatible
- > Good performance, large storage capacity, fast access to local files and applications.

### New Definition of Mobility and Versatility

The Compaq Tablet PC TC1000 is an innovative form factor offering unprecedented mobility and versatility for business computing.

### Versatility for changing needs and environments.

- > Removable keyboard provides the ability to change from tablet mode to notebook PC mode with the flip of a switch
- > Docking solution provides unprecedented desktop flexibility Integrated wireless LAN maximizes mobility in a business setting

### Effectiveness in a meeting

- > Tablet mode is preferred for face-to-face collaboration, including taking notes, annotating documents and viewing files or web pages
- > Communicate discreetly within and beyond the meeting room

### Transition quickly and easily from meeting room to office

- > Innovative, flexible docking system for use back at the desk
- > Docks with or without the keyboard
- > “Grab and Go” – no synchronization required

### On the Road or at Home

- > Attach the mobile keyboard and compose documents, email or presentations.
- > Mobile keyboard hides discreetly for writing, or quickly swings into place for typing

### Simplicity of pen and paper

The Compaq Tablet PC TC1000 offers simplified computing by adding the convenience of handwriting.

Write the way you naturally write

- > Write and store information as “digital ink” – it’s just like paper, only better
- > Draw pictures or sketch
- > Accommodate your work style – portrait or landscape
- > Use ink-to-text utility with any Windows application

### Mark up documents with handwritten comments

- > Annotate documents within applications supporting digital ink
- > Store annotations and send to others
- > Take notes and view files or web pages
- > Communicate quickly and discreetly with others using digital ink
