DECpc 333 Portable

Industry-Standard 80386DX Performance in an Expandable, Portable PC

The DECpc™ 333 Portable computer is a powerful, industry-standard, laptop computer that delivers full 386DX performance in a versatile package weighing less than 12 pounds. Based upon the 33 MHz Intel™ 386DX microprocessor, the DECpc 333 Portable provides the power you need for the most demanding applications.

The DECpc 333 Portable is ideal for windowing environments such as Microsoft® Windows,™ as it features a unique, integrated mouse pad that is touch-sensitive for use with your finger, pen, or stylus.

The DECpc 333 Portable meets Digital's high-quality, worldwide PC industry standards, and is completely compatible with Digital's PC networking products. It is designed as a network personal computer, giving users full access to application programs, data files, and other resources.

A High-Powered Productivity Tool

The DECpc 333 Portable is packed with features found in a full-size personal computer. It includes 4 MB of RAM expandable to 20 MB, a 101-key IBM® PS/2®-style keyboard, a backlit LCD, VGA display, serial and parallel interfaces, a 60 MB internal hard disk drive, 1.44 MB internal floppy drive, rechargeable Nicad battery, one half-size AT-slot, detachable keyboard, and interface to an expansion chassis. In addition to the integrated mouse pad, the DECpc 333 Portable also features a mouse port for those wishing to use an external PS/2-compatible mouse.

No matter where you are, you can share information with others — instantly. By using the optional 9600 baud fax/modem, connectivity to home or office is easy. And by using an optional Ethernet card, connecting the DECpc 333 Portable to a network is simple, too.
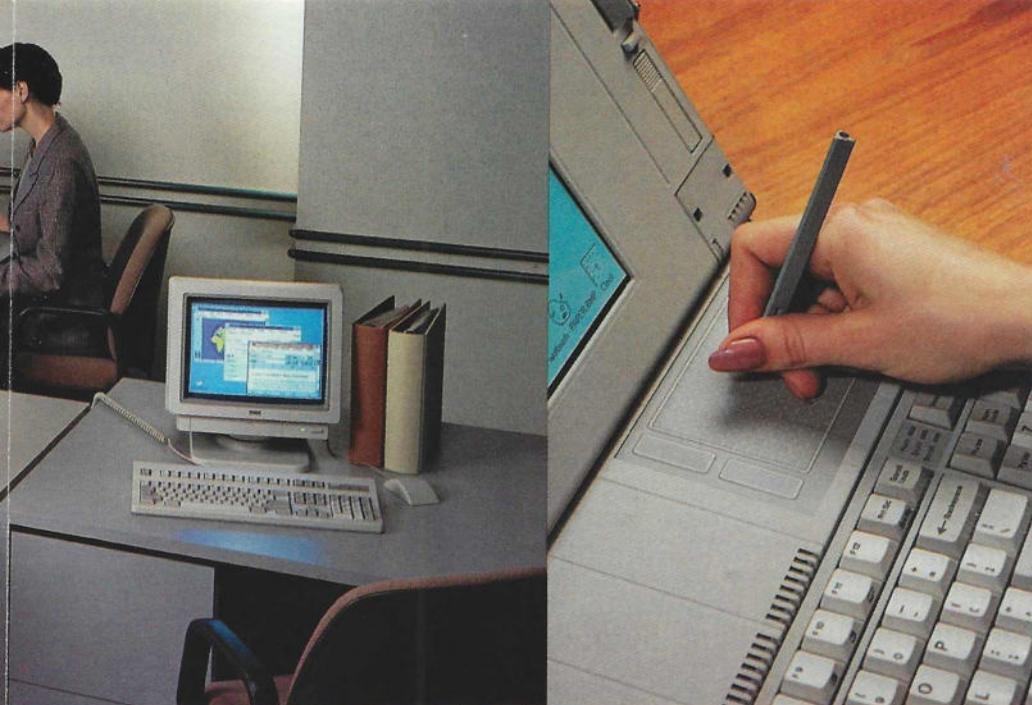

A wide variety of options is also available for the DECpc 333 Portable, including additional memory, a 33 MHz math coprocessor, an additional battery pack, a 9600 baud fax/modem, and a carrying case.

386 Power and Portability Combine to Give You a Competitive Advantage

Ideal for any mobile professional who needs the productivity of a personal computer, the DECpc 333 Portable enables you to create important correspondence, and provides remote access to information such as configuration charts and pricing from larger databases.

Customer service representatives can use the DECpc 333 Portable to store and access technical documentation required to service equipment. In addition, the unit can be used to document repair activity and generate billing reports. You can also connect the DECpc 333 Portable to a network with an interface card, and diagnose network devices.

Sales and insurance professionals will find the DECpc 333 Portable a real asset—and a true productivity tool while traveling. Users will be able to send or receive mail as well as create word processing documents, spreadsheets, and overhead presentations as easily as in their office —with complete PC compatibility.

Highlights

- 33 MHz Intel 80386DX microprocessor
- Weighs 11.9 pounds (with battery)
- Integrated, touch-sensitive mouse pad for finger or stylus
- 4 MB standard memory, expandable to 20 MB
- 101-key PS/2-style keyboard

- One half-size AT-bus slot; One dedicated modem/fax option available
- Battery life of 2.5 hours; One battery pack, AC power adapter/battery charger included
- Optional expansion chassis
- Runs MS-DOS® 3.3 and above, Microsoft Windows 3.0, OS/2® 1.1 and above

Integrated Mouse Pad Makes Windowing Easy

The DECpc 333 Portable includes an integrated, touch-sensitive mouse that allows efficient use of Microsoft Windows and other interfaces without the need for an external mouse.

The DECpc 333 Portable is the perfect solution for the business professional wishing to capture signatures electronically, as the integrated mouse pad can be used to sign forms, letters, and other correspondence quickly and easily.

Expansion Chassis Provides Additional Storage, Slots, and Connectivity

The DECpc 333 Portable also features an optional expansion chassis, offering complete desktop functionality. The unit includes two full-size, AT-bus expansion slots, a 5.25 inch storage device bay, and parallel, serial, keyboard, VGA, and mouse ports. This allows you to add industry-standard color monitors, a full-sized keyboard, disk drives, an Ethernet card, a fax/modem, or other option cards. The unit also recharges the DECpc 333 Portable's battery while connected.

Power Indicator and Optional Rechargeable Batteries Extend Your Computing Time

With a dedicated processor to control power consumption and an LCD readout continually displaying the state of your battery, you can extend your computing time. A second optional battery can plug into the AC adapter, enabling you to charge both the battery in the unit and a second battery simultaneously.

Commitment to World-Class Service

Digital offers a one-year, standard, return-to-service warranty and offers additional flexible service plans to meet your needs.

When you buy from Digital, you're backed by one of the largest service and support organizations in the world. The high level of quality and dedication to customers, large and small, is precisely what you expect from an industry leader.

The Next Step Is Up to You
