

Dell™ Latitude™ D630

Impressive, influential and exceptionally smart

The Dell Latitude D630 is designed to deliver an outstanding mix of performance, graphics and mobility — all packed into a compact, lightweight box. This full-featured mainstream notebook enhances the previous-generation Latitude D620 with the latest Intel® Core™ 2 Duo processors, your choice of Intel integrated graphics or NVIDIA® discrete graphics, and new levels of customisation.

The fully configurable Latitude D630 can come pre-loaded with Microsoft® Windows Vista™, Microsoft® Windows® XP or Free DOS to suit your business needs. IT decision-makers will appreciate the optional encrypted or Solid State Drives, along with D-family peripheral commonality. Users will appreciate the multiple graphics card options, and the enhanced productivity offered by the bright displays.

If your priority/need is:	Choose
Overall ultimate performance and speed	7200 RPM drives
Security	Encrypted hard drives
Durability	Solid State Drives

Innovative Design: Advanced options and new levels of customisation

- The latest Intel® Core™ 2 Duo processors, with choice of Intel integrated graphics for optimal battery life or NVIDIA® discrete graphics for enhanced performance
- Microsoft Windows XP Professional SP2, Microsoft Windows Vista™
- Energy-efficient systems designed to meet or exceed the worldwide mutually recognised Environmental Protection Agency's (EPA) ENERGY STAR® Standard

RoadReady™: Designed, tested and built for quality

- Full magnesium-alloy construction for years of reliable performance
- Optional Solid State Drives have no moving parts, which helps improve durability and reliability
- Strike Zone™ hard drive offers 24/7 data protection against life's bumps and bruises

HyperConnect™: Keeps users connected virtually anytime, anywhere¹

- Wireless-N, based on 802.11n technology, with up to 5X the speed and 2X the range of traditional Wi-Fi® when used with a Wireless-N router²
- HyperBand Diversity Antenna delivers superior multi-band wireless performance for Wi-Fi
- Built-in Wi-Fi Catcher™ switch lets you quickly find a network, even when the notebook's closed

Smart Security: Strategic, comprehensive endpoint solutions

- Optional encrypted hard-drive delivers full disk encryption without compromising performance
- TPM security chip enables a personal virtual drive for all of your encrypted files
- Wave EMBASSY® Trust Suite works with the TPM chip for robust file/folder encryption and much more

MANAGEABILITY

Dell Client Manager	Helps make our notebooks and desktops some of the easiest and most cost-effective client systems you can own. DCM provides centralised, remote control and automates common tasks associated with owning client systems. The results can be powerful: fewer desk-side visits and repetitive tasks, greater visibility and control of client inventory and usage, and improved consistency and compliance in the way client systems are configured

1 Where wireless access is available. Additional access charges apply in some locations.

2 Speed claim for comparative purposes only. Actual speed varies with environment, equipment and other factors and will be less, while range may vary due to number of users, interference, transmission barriers (such as walls and building material), and other factors. Intel Wireless-N card: To achieve up to 5x the speed and twice the range of 802.11g, customer must use the Intel Wireless-N card with a 5GHz Wireless-N router; with a 2.4GHz Wireless-N router, speed will be less. Based on Intel testing using Chariot network testing tools in November 2006 on a notebook with an Intel 4965 Wireless-N card. Dell Wireless-N card: Wireless-N speed and range claims based on tests conducted by a third party testing company commissioned by Dell in June 2006 comparing the Dell Wireless 1500 Draft 802.11n and the Intel 3945 802.11a/g internal wireless cards in a Dell XPS M1210 notebook.

3 For systems using Windows XP, up to 256MB of system memory may be allocated to support integrated graphics, depending on system memory size and other factors, while for systems using Windows Vista, up to 358MB of system memory may be allocated to support integrated graphics, depending on system memory size and other factors.

4 The total amount of available memory will be less than 4GB. The amount less depends on the actual system configuration

5 For systems with Microsoft Windows XP, the total of local and shared system memory used by this graphics card is up to 256MB. Local on-board memory is 128MB. Up to 128 MB of system memory may be allocated to support graphics, depending on system memory size and other factors. For systems with Microsoft Windows Vista, the total of local and shared system memory available to this graphics solution is up to 358MB.

6. NVIDIA® Quadro NVS 135M: For systems using Windows XP, the total of local and shared system memory used by this graphics card is up to 256MB. Local on-board memory is 128MB. Up to 128 MB of system memory may be allocated to support graphics, depending on system memory size and other factors. For systems with Windows Vista and 2GB or less of system memory, the total of local and shared system memory used by this graphics card is up to 895MB. Local on-board memory is 128MB. Up to 767MB of system memory may be allocated to support graphics, depending on system memory size and other factors.

7 For hard drives, GB means 1 billion bytes and TB equals 1 trillion bytes; actual capacity varies with preloaded material and operating environment and will be less. With Dell Factory Image Restore installed, Windows Vista users will have 10GB of their hard drive capacity set aside for a recovery image.

8 Starting weight with integrated graphics and 14.1" WXGA+ display. Weights vary depending on configurations and manufacturing variability.

9 Modem download speeds are limited to 56Kbps. Upload speeds are less (about 30Kbps). Speeds can vary by line condition and modem manufacturer. Analog phone line and service required.

10 The term Gigabit Ethernet does not connote an actual operating speed of 1GB/sec. For high speed transmission, connection to a Gigabit ethernet server and network infrastructure is required.

11 The DVD region code can be changed up to 5 times and will then be locked so that it plays only DVD movies from the final region code selected.

12 Discs burned with this drive may not be compatible with some existing drives and players; using DVD+R media with +RW/+R drive provides maximum compatibility; R=capability to burn disc once; RW=capability to burn disc multiple times. Special media/disc required, and third party software may also be required for certain applications.

13 Gold Technical Support is available for Latitude, OptiPlex and Dell Precision only. In the event of a system or part replacement which may require access to an optical device and the customer has opted out of an optical device, Dell reserves the right to decline service until the customer grants Dell access to an optical device to enable support and serviceability.

14 CompleteCover service is available for personal computers, Axim PDAs, Dell branded projectors and LCD TV. CompleteCover excludes theft, loss, and damage due to fire, intentional damage, acts of God or natural disasters, animals, pets or pests. Customer may be required to return unit to Dell. For complete details refer to CompleteCover service agreement found at www.dell.com/ap/services. This service is only available in selected countries

15 Some Genuine Windows Vista features - like the new Aero user interface - are only available in premium editions of Genuine Windows Vista and require advanced or additional hardware (e.g. monitors). Check <http://www.dell.com.sg/vista>
