

Ergo AirBrick2

*Freedom to Roam...
Power to Perform...*

the **BRICK** computer co.

Tired of being tethered to your corporate LAN or stuck in that one room of your home office? The new AirBrick2 with its built in wireless network adapter is here to free you from those chains. Featuring a big 14.1" XGA display, processor speeds to 1.7GHz Pentium IV-M, expansion to 1GB, and storage to 40GB, the AirBrick2 gives you the freedom to roam about.

Display options include either a 14.1" 1024x768 XGA or a 14.1" 1400x1050 SXGA+ Active Matrix displays. Either choice provides a clear crisp display with over 16M colors supported.

The AirBrick2 incorporates the powerful NVidia SQ17 video graphics adapter. With 32MB of dedicated DDR RAM, this processor will easily handle your most complex presentations as well as some of the most graphically intensive games.

The AirBrick2 comes standard with an 8x DVD ROM, 8x4x24 CD Writer, but can also be configured with a 24x CD ROM, 8x DVD ROM, or 8x4x24 CD Writer.

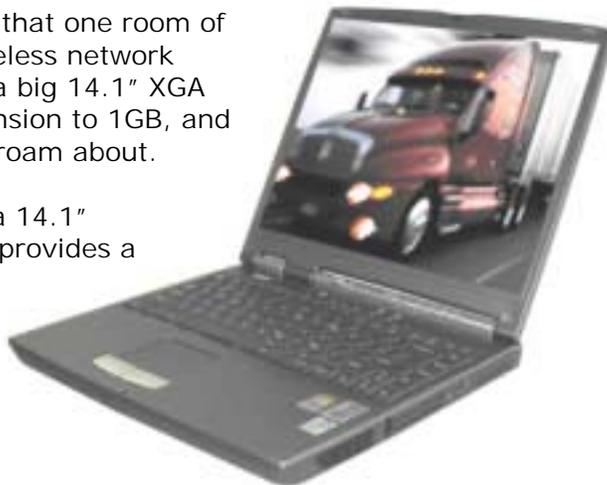

Connectivity is a must for today's information superhighway and getting and staying connected is what it is all about. We've got you covered; the AirBrick2 comes standard with an internal V.90 56k fax modem as well as an integrated 10/100 LAN for simple and fast connections with either your modem or broadband connections. When you are ready to go wireless the AirBrick2 is ready; an integrated wireless network adapter is built into the AirBrick. It's 802.11b architecture provides compatibility and interoperability with all 802.11b adapters and access points for an easy integration into new or existing environments.

Graphics and processing speed are not enough for today's multimedia applications. The AirBrick2 incorporates a 3 dimensional full duplex sound system and provides jacks for both headphones and a microphone as well as built in stereo speakers. The AirBrick can also double as a portable MP3 player. Now you can download music from the Internet and play it back without having to turn the computer on.

Not found on your average notebook is a Smart Media slot for transferring digital pictures or simply providing an easy backup solution on inexpensive 128MB Smart Media cards. This feature is standard on every AirBrick. Simply insert your Smart Media card in the slot and the card will appear as a removable drive on your computer. Now you are ready to transfer the files to your hard drive, email them as an attachment, or record the files onto to your internal CD Writer.

We think you'll agree, the AirBrick2 is a great product at a great price. Backed by a 15-day money back guarantee, a 60-day satisfaction guarantee, and a 1-year warranty, the AirBrick2 sets the standard for price and performance in a quality notebook.
