The Fiesta

There's a Party Going On!

You could have a party with the extra cash you'll save when you buy one of our Fiesta notebooks. All the great components you need today are already included, like a Lithium ION battery, a big 13.3" active matrix screen, carrying case, 24x CD ROM, and a 3.5" floppy. You won't need to buy a modem or LAN adapter because they are built in too!

Our Fiesta is the perfect combination of price and performance. Featuring a 13.1" XGA 1024x768 active matrix display, processor speeds to 850MHz Pentium III, expansion to 320MB, and storage to 48GB, these are not bargain basement portables.

The Fiesta comes standard with a 24x variable speed CD ROM, but for a few dollars more you can upgrade to an 8x DVD ROM for playback of the latest DVD titles and movies.

The Video on the Fiesta is a highly integrated graphics processor by SIS Corporation, a leading manufacturer of graphic systems for over 8 years. The highly integrated SIS 630 is their latest entry into the portable market and offers a shared video RAM architecture that allows you to define how much video RAM you need, from 2MB to 32MB. The 630 also features great 3D support with adjustable 3D performance in software.

Graphics and processing speed are not enough for today's multimedia applications. The Fiesta incorporates a 3 dimensional full duplex sound system and provides jacks for both headphones and a microphone. Once again SIS provides excellent sound reproduction utilizing the SIS 7018 audio adapter.

Connectivity is a must for today's information and getting and staying connected is what it is about. The Fiesta comes standard with an internal V.90 56k fax modem as well as an integrated 10/100 LAN for simple and fast connections.

The Fiesta has 3 dedicated access buttons allowing instant access to your email software, web browser, or whatever program you use... at the touch of a button! Even more buttons are on the front of the Fiesta allowing you play and control an audio CD even when the computer is off.

We think you'll agree, the Fiesta is a great product at a great price. Backed by a 15-day money back guarantee, a 60-day satisfaction guarantee, and a 1-year warranty, the Fiesta sets the standard for price and performance in a quality notebook.

The Brick Computer Company, Inc., 461 Boston Street, Unit D3, Topsfield, MA 01983
