

## HP COMPAQ 2710P NOTEBOOK PC

PRODUCTIVITY WITH A TWIST.

Ultra-thin convertible tablet in an innovative design

HP recommends Windows Vista™ Business

### **Total productivity—totally cool**

Starting at only 3.6 lbs /1.65 kg and 1.11 in/28.2 mm thin, the HP Compaq 2710p Notebook PC offers you the functionality of an ultra-light notebook *plus* the flexibility of an ultra-slim tablet.

### **Unique widescreen display and writing surface**

A 12.1-inch diagonal widescreen Illumi-Lite display<sup>15</sup> provides you with a slimmer and lighter notebook PC that is more energy efficient than a notebook with traditional LCD backlighting. The chemically-strengthened glass top will not wear down with repetitive use, and resists the effects of "pooling". The optional outdoor view display delivers a significantly better display appearance when working in bright light conditions.

### **Redefining what you can do on the go**

With a dual-microphone array and optional integrated camera, enjoy video and web conferencing, video-enhanced instant messaging, and VoIP,<sup>4</sup> and capture business card images that automatically convert to text in your favorite contact application. Use the HP 2700 Ultra-Slim Expansion Base with integrated DVD+/-RW drive<sup>3</sup> as a docking station in the office, or take it with you

while on the go. Across the street or across the country, stay connected in more places with HP Broadband Wireless.<sup>4</sup> You also have the flexibility to add HP Broadband Wireless at a later date.

### **HP Professional Innovations help you focus on your business**

*Built to protect.* An array of multi-layered, customizable security solutions help defend your network, your applications, and your data. The new Drive Encryption for HP ProtectTools encrypts all information on the hard drive volume so it becomes unreadable to an unauthorized person.

*Built to simplify.* Boost your productivity in low-light conditions while maximizing simplicity with the HP Night Light that shines directly on your keyboard.

*Built to last.* Reliable features such as HP DuraKeys, HP DuraFinish, full magnesium alloy enclosure, and HP 3D DriveGuard help your notebook go the distance.

# HP COMPAQ 2710P NOTEBOOK PC

HP recommends Windows Vista™ Business

<b>Operating system</b>	<b>Preinstalled:</b> Genuine Windows Vista Business 32/64 <sup>1</sup> Genuine Windows Vista Home Basic <sup>1</sup> Genuine Windows XP Tablet PC Edition 2005 FreeDOS	<b>Supported:</b> Genuine Windows Vista Enterprise <sup>1</sup>

<b>Warranty</b>	Limited 3-year, 1-year and 90-day warranty options available depending on country, 1-year limited warranty on primary battery	

1. Certain Windows Vista product features require advanced or additional hardware. See [www.microsoft.com/windowsvista/getready/hardwarereq.mspx](http://www.microsoft.com/windowsvista/getready/hardwarereq.mspx) and [www.microsoft.com/windowsvista/getready/capable.mspx](http://www.microsoft.com/windowsvista/getready/capable.mspx) for details. Windows Vista Upgrade Advisor can help you determine which features of Windows Vista will run on your computer. To download the tool, visit [www.windowsvista.com/upgradeadvisor](http://www.windowsvista.com/upgradeadvisor). 2. Dual Core is a new technology designed to improve performance of certain software. Not all customers or software applications will necessarily benefit from use of this technology. 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on hardware and software configurations. See [www.intel.com/info/em64](http://www.intel.com/info/em64) for more information. 3. Do not copy copyright-protected materials. Intended for creation and storage of your original material and other lawful uses. Double layer discs can store more data than single layer discs. Double-layer discs burned with this drive may not be compatible with many existing single-layer DVD drives and players. Note that DVD-RAM cannot read or write to 2.6 GB Single Sided/5.2 GB Double Sided – Version 1.0 media. 4. Wireless, internet, and VoIP require separately purchased service contract. Check with service provider for availability and coverage in your area. Available in select countries only. 5. The specifications for the 802.11n WLAN are draft specifications and are not final. If the final specifications differ from the draft specifications, it may affect the ability of the PC to communicate with other 802.11n WLAN devices. 6. Wireless access point required and is not included. Availability of public wireless access points limited. 7. For hard drives, GB = 1 billion bytes. Actual formatted capacity is less. Up to 8 GB (for XP) and 10 GB (for Vista) of system disk is reserved for the system recovery software. 8. Shared video memory (UMA) uses part of the total system memory for video performance. System memory dedicated to video performance is not available for other use by programs. 9. The term "10/100/1000" or "Gigabit" Ethernet indicates compliance with IEEE standard 802.3ab for Gigabit Ethernet, and does not connote actual operating speed of 1 Gb/sec. For high speed transmission, connection to a Gigabit Ethernet server and network infrastructure is required. 10. HP Fast Charge recharges your primary battery up to 90% within 90 minutes when the system is off. HP Fast Charge does not apply to HP 2700 Ultra-Slim battery. 11. Sold separately or purchased as an optional feature. 12. Select models only. Some functionality of Intel Centrino Pro, such as Intel Active management technology and Intel Virtualization technology, requires additional 3rd party software. Availability of future "virtual appliances" applications is dependent on 3rd party software providers. Compatibility of this generation of Centrino Pro technology-based hardware with future "virtual appliances" and Windows Vista is to be determined. 13. TPM module disabled where not permitted by law. 14. Operates at a maximum of 533-MHz with 667-MHz memory. 15. Results achieved with similarly configured PCs both using 9-cell batteries. Results may vary with 3- and 6-cell batteries, loaded applications, features, and power management settings.
