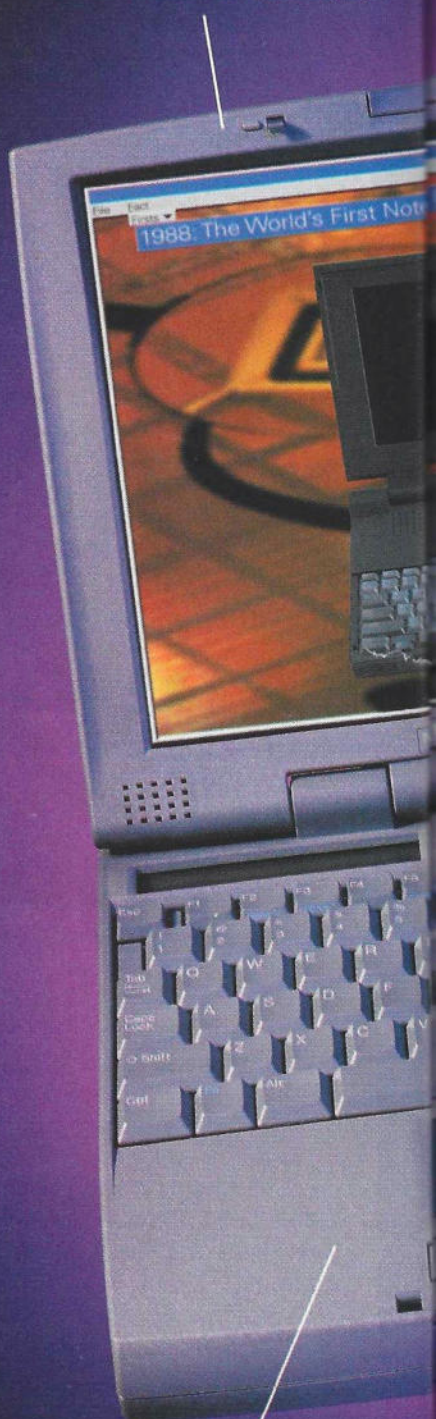
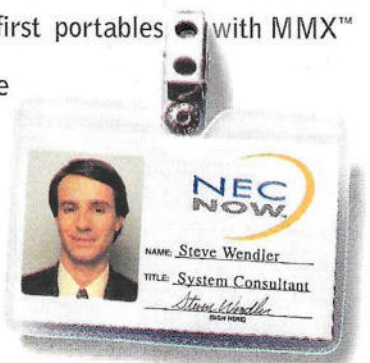
We've contributed several advances to the notebook PC.

Like inventing it.

Greater availability because NEC is one of the world's largest manufacturers of TFT LCD displays.



NEC also introduced the first color laptop. The first notebook with an active matrix display and modular components. And one of the first portables with MMX™ technology. What's more, we offer the most extensive selection of notebooks available.



Our approach to direct sales is no less innovative. NEC NOW℠ connects you with System Consultants who have the expertise to match the right notebook to your unique situation. And NEC NOW is backed by the resources, quality and dependability of one of the world's largest computer companies. We even give you the choice of working through a qualified NEC reseller partner.

Why NEC NOW?

- The security of partnering with a company known for its technological innovations.
- The flexibility of ordering direct or through a reseller.
- The expertise of System Consultants.
- The immediate availability of competitively priced products.
- The resources of one of the world's largest computer companies.

NEC NOW

So when you need a notebook PC, call the company that invented it. And reinvented direct sales.
