- Choice of displays
 - Reflective Supertwist LCD
 - Backlit Supertwist LCD
- Runs on removable, rechargeable battery pack
- Exceptionally light and compact

Now Includes
MS-DOS 3.3

T1200

Multiple Choices.

And All The Right Answers.

Toshiba's T1200 portable is an ideal solution, any way you configure it. Begin with the exact capabilities you need today, then grow just as far and just as fast as you'd like.

There's never a need to over-buy, and there's never a problem with expansion! **Off to a great start.**

The most economical T1200 weighs less than ten pounds, but is really heavy on features.

This compact, battery-powered dual diskette computer has an 80C86 microprocessor that

runs at 9.54MHz. Standard memory is 1MB (includes 384KB LIM/EMS), and is expandable to a full 2MB. Rounding out the list of impressive specs are a pair of built-in 720KB 3½" diskette drives and Toshiba's high legibility super-twist LCD screen that's ideal in most lighting situations.

Grow on the go.

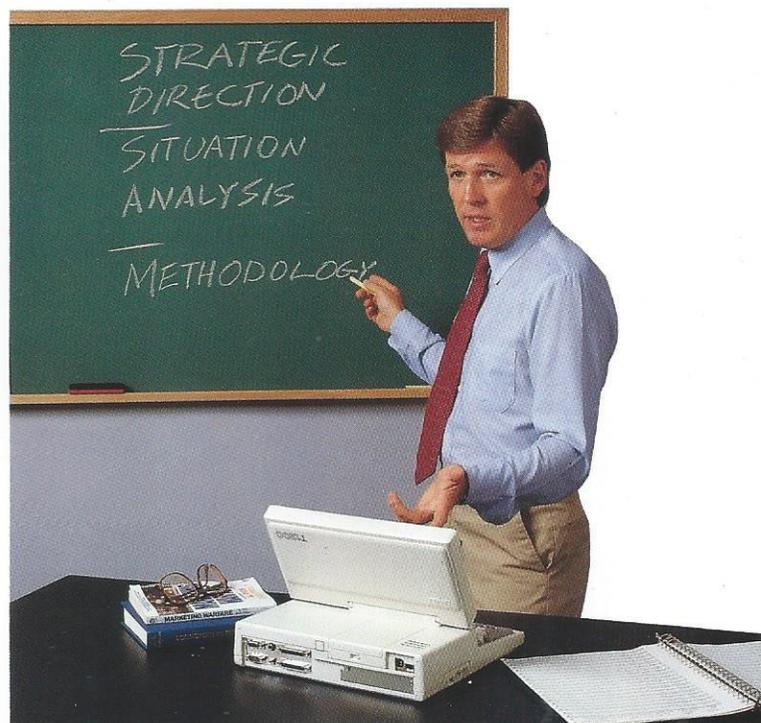

Chances are, your first step up will be to add an optional backlit display. Toshiba's unique "borderless" design is easy on the eyes and especially well suited for use in low light levels.

Another fine choice is hard disk power. Toshiba's optional 20MB drive can be added, replacing one of the diskette drives.

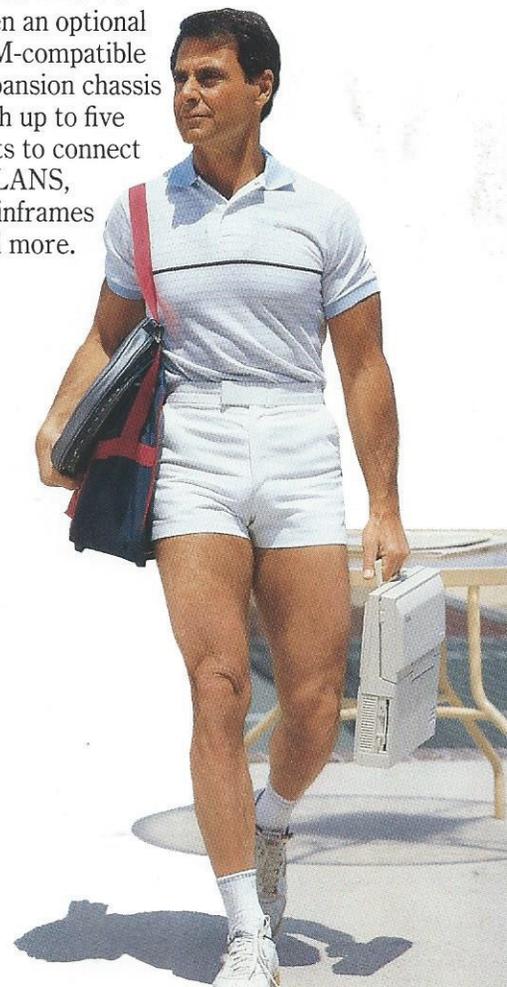

Like the backlit display—or any T1200 option for that matter—it can be easily upgraded at any time.

New questions? New answers!

When you begin asking yourself about adding modems, printers, color monitors and such, you'll really appreciate the T1200's

full complement of seven built-in ports. There's even an optional IBM-compatible expansion chassis with up to five slots to connect to LANS, mainframes and more.

T1200

Portable Personal Computer

Grow with Toshiba's upwardly mobile computer. Like any good portable, the T1200 helps you move around. The big difference is that the T1200 also helps you move up with capabilities you won't outgrow.

More than friendly, this computer is exceptionally efficient. Its full-size keyboard has the familiar layout of desktop machines. And it's easily customized to your personal work style, thanks to software-driven set-up commands. As another productivity aid, AutoResume™ remembers your place when you turn the computer off, right down to the cell in a spreadsheet. And for further convenience and extra value, MS-DOS and disk cache utility software are included with your new T1200.

Toshiba's T1200 is an ideal solution, any way you configure it.

Thanks to built-in battery power and a world-wide AC adapter, you can do your work anywhere. The T1200 runs on removable, rechargeable batteries and features an intelligent power supply that tells you remaining battery power. Also available are additional removable, rechargeable battery packs for extended usage. You can recharge packs in the computer, or do it faster with Toshiba's optional battery pack recharger that handles three packs and recharges each in just 1.5 hours.
