

TOSHIBA

T1800/T1850/T1850C

Personal Computer

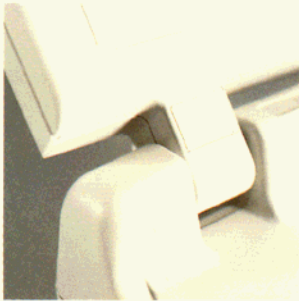

*"Now that I can afford Toshiba quality,
nothing can keep me down."*

Not so long ago, computers were strictly for a small group of experts. Today almost everyone needs them. They're more personal, less expensive, easier to use, and thanks to Toshiba, ready whenever and wherever you need them. And now we've designed a new generation that will put quality within everyone's reach. The T1800, T1850 and T1850C are affordable notebook computers designed and manufactured by Toshiba with all the experience gained through seven years of market leadership. They have none of the compromises you might worry about from cheaper imitations. A first glance and touch will reveal the Toshiba difference – contemporary, rounded styling; an extra-long battery life; a keyboard that feels perfect to the touch; a large, bright screen that's a comfort to the eye, and even colour if you need it. In short, useful details for those who value perfection. So if you've been thinking about investing in a notebook PC, why not get the best from the world leader in mobile computing. Take it from Toshiba.

Take it from Toshiba

Round at the edges, a new design for style and stability.

The 84-key keyboard has 12 function keys and responds perfectly to the touch.

The large, bright screen allows you to take colour with you.

A sliding door is built into the computer case to protect interfaces.

Power and performance.

Based on 386 technology with speeds of either 20 or 25 MHz, these Toshiba notebooks offer an affordable platform for all the latest applications. The T1800 comes with either a 40 or 60 MB hard disk; the T1850 and T1850C give you the choice between an 80 or 120 MB hard disk. RAM starts with a standard 2 MB on the T1800 and 4 MB on the T1850 and T1850C, enough even for memory-hungry Windows applications.

If you happen to need more, you can expand your memory simply and easily, thanks to the 2, 4, or 8 MB credit-card-sized expansion cards.

Longer battery life.

Toshiba pioneered power management in notebook computers. The T1800 and T1850 carry on this tradition with up to five hours of battery life* – about an hour more than most notebooks. How did we do it? Several years ago Toshiba started developing its own power-saving ASIC chips and technology. Called MaxTime™ Power Management, this concept is implemented on all Toshiba notebooks. Additionally, on these notebooks we've supplied

5 hrs

mented Toshiba MaxTime™ Power Management with the new, industry-standard Advanced Power Manage-

ment (APM). This combination of power-saving features gives the Toshiba user longer battery life today, and support for the future when a whole range of software programs will make the most of APM.

Looking good, feeling good.

These notebooks will reflect your high standards. Softer at the edges, the elegant Toshiba styling makes your notebook nicer to look at, easier to carry and less likely to get knocked about when you're on the road. This comfort extends to other features too. The Toshiba keyboard is a result of customer feedback. It has perfect tactile response, yet is so quiet it won't distract those around you. You also get 84 full-sized sculptured keys, including 12 function keys and a convenient set of 8 cursor keys in the preferred inverted "T" layout. Another highlight is the screen. Toshiba screens are large and easy to read. They're 9.5 inches across the diagonal, have excellent brightness and contrast, and can be tilted to any angle you want, where they stay in position.

Quality – right down to the last detail.

You'll find many of the same special details on these affordable notebooks as on our more advanced models. An internal slot gives you the same advanced communications options such as modem, fax and ISDN. With Toshiba AutoResume you can turn off your computer at any time and not lose your place. It's like an electronic bookmark. And if your battery happens to run down, Toshiba AutoSave will automatically save your data. BIOS is implemented in flash memory. So if an update is ever required, Flash BIOS lets you do it yourself easily. You also get double security from a power-on password feature and a built-in provision for the optional Kensington cable lock.

Reliability that Toshiba guarantees.

Toshiba's advanced technology ensures that you get real value and

quality you can trust. Not only that, it's quality that comes guaranteed. The Toshiba International Warranty is just another reason why Toshiba leads the world in mobile computing.

NOTEBOOK MODELS

Toshiba T1800

20 MHz Intel 386 SX, coprocessor socket; 2 MB standard RAM, expandable to 10 MB; LIM-EMS 4.0 support; 40 or 60 MB hard disk; 9.5" STN monochrome screen with 64 grey scales.

Toshiba T1850 & T1850C

25 MHz Intel 386 SX, coprocessor socket; 4 MB standard RAM, expandable to 12 MB; LIM-EMS 4.0 support; 40 or 60 MB hard disk; T1850: 9.5" STN monochrome screen (64 grey scales); T1850C: 9.5" STN colour screen with up to 256 colours from a palette of 262,144.

STANDARD SPECIFICATIONS

Diskette Drive 3.5"

720 KB/1.44 MB; media type checking.

Display

9.5" diagonal; 640 x 480 dot resolution.

Graphics

VGA compatible; 16 colours or grey scales in 640 x 480 pixels; 256 colours or 64 grey scales in 320 x 200 pixels.

Interfaces

Parallel/FDD; serial; external colour monitor; numeric keypad; PS/2 mouse port.

Expansion

Communications slot for modem, fax/modem or ISDN.

Keyboard

84 keys; 12 function keys; 8 cursor keys in inverted "T" layout; integrated numeric keypad.

Battery Type/Life*

Removable NiCd; T1800/T1850: 2.5-5.0 hours; T1850C: 2.5-3.5 hours.

Power Supply

Autosensing 100-240 V AC adaptor for world-wide usage.

Toshiba Special Features

HardRAM; AutoResume; AutoSave; Flash BIOS, Pop-up Menu.

Power Management

Toshiba MaxTime™ Power Management; Advanced Power Management.

Security

Power-on password; Kensington cable lock provision.

Size

T1800/T1850: 30 x 5.7 x 21.4 cm (11.8" x 2.2" x 8.4")
T1850C: 30 x 5.9 x 21.4 cm (11.8" x 2.3" x 8.4").

Weight

T1800/T1850: 3.1 kg (6.8 lb) T1850C: 3.3 kg (7.3 lb).

Options for All Models

Carrying case; MS DOS 5.0; 2, 4, 8 MB memory cards; key caps for European languages; external numeric keypad; external keyboard adapter; 5.25" diskette drive; extra AC adaptor; extra battery pack; car adaptor; battery charger; Express-Writer portable printer.
