T2000

Personal Computer

"Freedom in space and time helps me achieve new levels of success".

Today's top professionals must act, and react, rapidly. The more flexible they are, the more in control they are, and therefore potentially more successful. Their personal computers have to match up by being portable, reliable and stylish, yet durable enough to endure the stresses and strains which come with the job. Their computers should enhance rather than constrain their business activities. The Toshiba T2000 is designed with these criteria in mind, a 286 notebook computer with a performance that matches many desktop PCs, ideal for modern executives who need to succeed wherever they go. Its advanced configuration provides new scope for breaking free from the nine to five office environment. Something at which Toshiba, the world leader in portable computers, has become an expert. The T2000 is an affordable workhorse, sporting only the features required to get the job done. It is designed specifically for practical, everyday computing, without the advanced frills of high-end systems. It is built for people who want to make rapid progress with tasks such as word processing and spread-sheet manipulation, instead of more complex activities. It has all the special details that have made Toshiba the leader in mobile computing. Above all, it has the Toshiba capacity to take the user much further than other PCs.

The business winner that's just asking to be used.

Even though it measures only 310 x 254 x 46 mm, and weighs a mere 3.1 kg, the T2000 has a full complement of Toshiba's popular user-friendly features. Our advanced sidelit LCD technology, for example, creates a black and white display with higher than average contrast for easy viewing, even under adverse lighting conditions. A high-speed VGA controller ensures a rapid image build-up that's ideal when using a mouse or an advanced graphics-based interface like Windows. And although we specialise in making computers small, we don't make them too small. Unlike many other portables, the T2000 has a full-sized array of 88 sculptured keys. Emphasis has been placed on ergonomic design and the correct tactile response, to minimize tiresome fingerwork and keying inaccuracies.

Accelerating your performance in and out of the office.

With the T2000 you no longer have to keep readjusting to a desktop PC each time you return to the office. Via the standard monitor port this machine will hook up to a full-sized VGA colour monitor display. Even more impressively, it plugs into the optional Desk Station for an even greater array of interfaces and industry-standard expansion options. So when you leave the office you take only what you need for the job, leaving your Desk Station environment ready for your return. Use the T2000 out of the office, and you'll find it has all the interfaces you'll ever need. You can hook up to a portable printer such as the Toshiba ExpressWriter 201, or a VGA data projector. With the T2000

you need never be out of touch. An internal communications slot for a modem or the Toshiba ISDN Solution allows you to make the right connections.

Flexible memory that adds to your acumen.

With credit card sized memory expansion cards you can increase the T2000's standard 1 MB RAM to a total of 9 MB, easily and in a matter of seconds. The cards let you step up RAM capacity in combinations of 1, 2, 4 or 8 MB, according to your needs. This and the optional numeric coprocessor enables you to run more demanding programs. Similarly your choice of 20 or 40 MB hard disk depends on the complexity and range of software you use. Features like these make the T2000 a powerful extension to your business tool-kit giving you access to vast amounts of data almost instantly.

The details that make you a more potent force in business.

Toshiba is the only major PC manufacturer to focus exclusively on portable computing. The result is practical detail that enables Toshiba to dominate in portable business computing with features like :

- Toshiba AutoResume™, an electronic "bookmark", which automatically remembers and loads the last file you worked on.
- Toshiba AutoSave™, a safety feature that automatically stores a copy of the data you are working on by switching to AutoResume™ mode if the battery runs out.
- Toshiba MaxTime™ Power Management, which saves power by putting the hard disk, screen and processor to sleep when idle.
- Toshiba HardRAM™, a fast battery supported disk in RAM, that will increase speed and econo-

mize on battery power.

- 9 status LEDs, visible even when the machine is closed, so you can check your T2000's status at a glance.
- A pop-up menu for instant system control.
- Tiny rubber pads to make sure you're working on a solid foundation wherever you are.

These features, together with a worldwide dealer network have helped make Toshiba the world leader in mobile computing.

Product Specifications

Processor

Intel 80C286
12/6 MHz clock speed
Reset switch
AutoResume™ mode
Socket for optional 80C287 numeric coprocessor

Memory

Standard 1 MB RAM
Expandable to 9 MB
(1, 2, 4, or 8 MB cards)
LIM EMS support
(3.2 HW, 4.0 SW)
XMS support with MS-DOS 4.0
Toshiba HardRAM™

Hard Disk

40 or 20 MB
19 ms average access time

Diskette Drive

Built-in 3.5" 720 KB / 1.44 MB diskette drive
Media type checking

Display

Sidelit Supertwist LCD
Black and white
640 x 480 dot resolution
16 grey scales

Graphics Adapter

VGA compatible
256 colours on external screen

Operating System

MS-DOS 4.01 or
MS-DOS 3.3 (option)

Keyboard

88 full-size sculptured keys
Familiar layout
12 function keys,
8 dedicated cursor keys
Integrated numeric keypad

Interfaces

25-pin bidirectional parallel/FDD port (Centronics compatible),
9-pin RS-232C serial port,
100-pin expansion connector for Desk Station II,
15-pin analogue VGA monitor port, Keypad port

Expansion

Internal communications slot
Desk Station II (option)

Power supply

Autosensing 100-240 V AC
adapter for world-wide usage

Battery

Rechargeable and removable
NiCd
3 hours battery life
MaxTime™ Power Management

Size

310 x 254 x 46 mm
(12.2" x 10" x 1.8")

Weight

3.1 kg (6.8 lb) with battery

Options

Carrying case,
Internal Hayes compatible modem*, Toshiba ISDN Solution*, Desk Station II, Extra battery packs, Internal 1, 2, 4 and 8 MB memory expansion cards, External 5.25" 360 KB diskette drive, Toshiba ExpressWriter 201 portable printer, External numeric keypad, External keyboard adapter, Key caps for European languages, Quick battery charger, Car adapter, MS-DOS 3.3, MS OS/2 1.21

* where approved
