

T2000SX

TOSHIBA

T2000SX

A small footprint in the office. A giant leap in technology.

Toshiba once again asserts its laptop leadership by combining the power of a leading-edge desktop computer with all the benefits of a Toshiba notebook. The Toshiba T2000SX features advanced i386 SX power and VGA graphics in the popular and ergonomic Toshiba notebook format. It's the best choice for business professionals requiring a small, powerful computer that can be used with the widest range of flexibility both in the office and out.

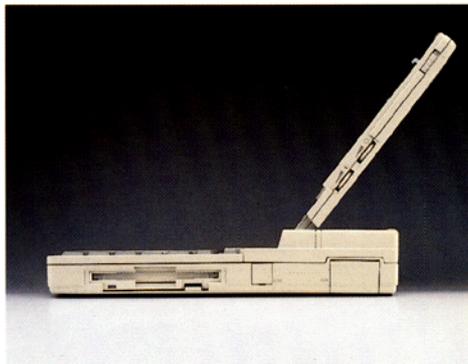

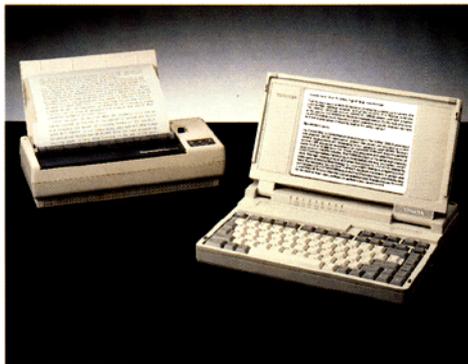

Big where it counts.

The T2000SX is in a performance class of its own. The 16 MHz i386 SX processor and optional i387 SX coprocessor provide the speed and processing power modern organizations are demanding to run advanced applications. Memory starts at 1 MB, and can be expanded to an impressive 9 MB with easy-to-use RAM cards. A 20 or 40 MB hard disk ensures that programs and data have plenty of space and are instantly available. The T2000SX employs the latest high-capacity nickel-hydrogen battery technology to keep battery life long and battery weight down. The high-resolution black and white VGA screen is a marvel of readability, using a special sidelit LCD technology for clear, bright viewing in all lighting conditions. The keyboard, too, confirms Toshiba's excellent reputation in design and functionality with a full set of 88 keys, including 12 function keys and 8 dedicated cursor keys. All these conform to a layout tested for user-friendliness, so there will be no need to learn new positions or awkward key combinations.

Typically Toshiba.

Toshiba leads the market in packing all the power and specifications of big desktop computers into tiny, yet extraordinarily functional notebook computers. The T2000SX is all neatly contained within a stylish body about the size of an A4 file and weighing only 3.4 kg – including the battery. The ergonomic VGA display and keyboard once again reflect Toshiba's conviction that notebook computers should be small – but not too small in these critical areas. The T2000SX also features Toshiba's AutoResume™ mode to avoid the hassle of rebooting, reloading and calling up files every time you switch on. The Toshiba Desk Station II can be added in the office to provide the same connectivity options as desktop computers. And the T2000SX is built to take an active life-style in its stride, with the same robustness and good looks that make all Toshiba laptops preferred travel companions.

All in all, the T2000SX opens up a whole new world of 386 productivity and power to notebook computer users on the move. So why not make a move in the right direction and visit your nearest Toshiba Authorized dealer today?

SPECIFICATIONS

Processor

Intel 80386 SX
16/8 MHz clock speed
(keyboard switchable)
Reset switch
Auto Resume Mode
Socket for optional 80387 SX numeric data processor

Memory

Standard 1 MB RAM
Expandable to 9 MB
(with 1, 2, 4 or 8 MB cards)
LIM EMS support (3.2 HW, 4.0 SW)
Hard RAM support

Hard Disk

20 or 40 MB
Less than 25 msec access time

Diskette Drive

Built-in 3.5" 1.44 MB/720 KB
Media type checking

Display

High resolution sidelit Supertwist LCD
Black and white
640 x 480 dot resolution
16 grey scales

Graphics Adapter

VGA compatible

Keyboard

88 full-size sculptured keys
Familiar layout
12 function keys
8 dedicated cursor keys
Integrated numeric keypad

Interfaces

25-pin bidirectional parallel (Centronics compatible)/external FDD port
