## T2000SXe
Personal Computer

*"It gives me the power I need
when I need it most"*

You give the best you can to your business. In return you need the best tools to do the job. In particular, you demand limitless, reliable computing power that can go with you anywhere. A computer that's rugged enough to take life's knocks and stylish enough to grace the boardroom. The computer that meets this tough specification is the Toshiba T2000SXe. One touch of the T2000SXe's ergonomically designed keyboard, one glance at the brilliant VGA screen, is enough to tell you this is the ultimate notebook computer. Your new found powerbase is built around a lightning fast 20 MHz 386SX processor, a choice of 40 or 60 MB hard disk, and RAM that starts at 2 MB and is expandable up to a massive 10 MB. In other words, more than enough for your present and future applications. Whether in the office or on the road, with the T2000SXe you can work with the most demanding programs and data, and communicate your results rapidly using the optional modem or Toshiba's unique state-of-the-art ISDN Solution. If you have to curtail a session, switch off and slip your computer into your briefcase, and go. When you want to resume computing, simply switch on and your machine will put the cursor back to the very line and column you were working on. That's what the T2000SXe is all about, power that's there when you need it.

As powerful on the road as it is on the desk.

The T2000SXe is as powerful as most desktops so it will match up to office demands. You can hook it up to a colour monitor to see VGA graphics in 256 colours. And by plugging it into a Toshiba Desk Station you can instantly acquire the power of an advanced office environment. The Desk Station has slots for full-size industry standard add-on cards, so the possibilities are limitless, and there'll be no tedious transferring of files or reloading software. Away from the office, you'll be carrying 386 power and VGA graphics with you, plus a wide range of interfaces. You can plug into our lightweight ExpressWriter 201 portable printer, or a VGA data projector when a major performance is called for. And when it comes to communications, the T2000SXe lets you make all the right connections—by modem or Toshiba's innovative ISDN Solution.

Super compact. But full-size where it counts.

It may measure just 310 x 254 x 46 mm and weigh a mere 3.1 kg, but the T2000SXe packs in a full complement of Toshiba user friendly features. A brilliantly clear, black and white fluorescent VGA display will hold people's attention with ease. The sidelit LCD technology is designed to give an excellent image, even in poor lighting conditions, and the high speed VGA controller ensures that images build up rapidly—ideal for use with a mouse and modern graphics based programs. An award-winning full-size 88 key array is an acknowledgement that you're a serious computer user. You'll find all the keys, including 12 function keys

and 8 cursor controls, precisely where you'd expect to find them for accurate, fatigue-free operation. The T2000SXe may be incredibly compact, but it's big on ergonomics.

How far do you want to go?

However advanced your requirements, current or foreseeable, this machine won't fail you. With the 40 MB hard disk you can go far, but the 60 MB will take you even further. Standard RAM is an ample 2 MB, but you can quickly and easily increase it simply by slotting in 2, 4 or 8 MB credit card sized memory cards according to need. Up to 10 MB means you have the power to go further, running the most advanced business and technical programs of today, and tomorrow. And if you're a nomadic number cruncher, you can slot in an Intel 387 SX numeric coprocessor to speed calculation intensive programs.

Attention to detail which makes all the difference.

One important reason why Toshiba is a world leader in portable computers is the capacity to focus on user needs in detail. Below are just some of the features of the T2000SXe that have resulted from this approach :

- Toshiba AutoResume™, an electronic "bookmark", which automatically remembers and loads the last file you worked on.

- Toshiba AutoSave™, a safety feature that automatically stores a copy of the data you are working on by switching to AutoResume™ mode if the battery runs out.

- Toshiba MaxTime™ Power Management , which saves power by putting the hard disk, screen and processor to sleep when idle.

- Toshiba HardRAM™, a fast bat-

tery supported disk in RAM, that will increase speed and economize on battery power.

- 9 status LEDs, visible even when the machine is closed, so you can check your T2000SXe's status at a glance.

- A pop-up menu for instant system control.

- Tiny rubber pads to make sure you're working on a solid foundation wherever you are.

These features, together with a worldwide dealer network have helped make Toshiba the world leader in mobile computing.

Product Specifications

Processor
Intel 386SX™
20/10 MHz clock speed
Reset switch
AutoResume™ mode
Socket for optional 387SX™
numeric coprocessor

Memory
Standard 2 MB RAM
Expandable to 10 MB
(with 2, 4, or 8 MB cards)
LIM EMS support (3.2 HW, 4.0 SW)
XMS support with MS-DOS 4.0
Toshiba HardRAM

Hard Disk
60 or 40 MB
19 ms average access time

Diskette Drive
Built-in 3.5" 720 KB / 1.44 MB
diskette drive
Media-type checking

Display
Sidelit Supertwist LCD
Black and White
640 x 480 dot resolution
16 grey scales

Graphics Adapter
VGA compatible
Up to 256 colours on external screen

Operating System
MS-DOS 4.01 or
MS-DOS 3.3 (option)

Keyboard
88 full-size sculptured keys,
Familiar layout, 12 function keys,
8 dedicated cursor keys,
Integrated numeric keypad

Interfaces
25-pin bidirectional parallel / FDD
port (Centronics compatible),
9-pin RS-232C serial port,
100-pin expansion connector
for Desk Station II,
15-pin analogue VGA monitor port,
Keypad port

Expansion
Internal communications slot
Desk Station II (option)

Power Supply
Autosensing 100-240 V AC
adapter for world-wide usage

Battery
Rechargeable and removable
NiH_2, 3 hours battery life,
MaxTime™ Power Management

Size
310 x 254 x 46 mm
(12.2" x 10" x 1.8")

Weight
3.1 kg (6.8 lb) with battery

Options
Carrying case,
Internal Hayes-compatible
modem*, Toshiba ISDN Solution*,
Desk Station II, Extra battery packs,
Internal 2, 4 and 8 MB memory
expansion cards, External 5.25"
360 KB diskette drive, Toshiba
ExpressWriter 201 portable printer, External numeric keypad,
External keyboard adapter,
Key caps for European languages,
Quick battery charger,
Car adapter,
MS-DOS 3.3, MS OS/2 1.21
* Where approved
