NOTEBOOK COMPUTER

T2130

SERIES

Ultra-Affordable and Portable

Introducing Toshiba's newest group of affordable portable notebook computers — the **Satellite T2130 Series**.*

High performance computing is easy to afford and enjoy in the office and on the road with the **Satellite T2130 Series**. These new portables provide increased connectivity, a built-in power supply and a powerful 75MHz IntelDX4™ processor.

AccuPoint™, Toshiba's remarkable isometric pointing device, provides easy cursor control.

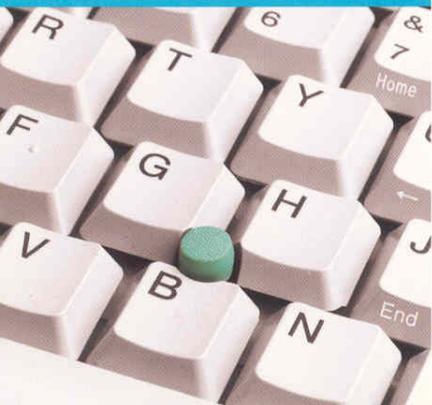

Built-In Power Supply and Battery

Increased portability begins with a built-in power supply — there's no bulky external AC adapter to carry, just a slim power cord. In addition, the rechargeable NiMH battery keeps you working longer between recharges with Toshiba's MaxTime® Power Management System.

Innovative Turbo 75 Performance

Plenty of power has been packed into the **Satellite T2130 Series** with Toshiba's advanced "Turbo 75" Technology. Toshiba's Turbo 75 Technology is a sophisticated overall performance architecture that utilizes a 75MHz IntelDX4 processor, local bus video, graphics acceleration, fast page RAM access and more. With highly power-efficient components, Toshiba's optimized Turbo 75 can outperform 100MHz competitors while offering better battery life.

*T2130 Series products are sold at selected retailers as T2135CS and T2135CT with additional pre-installed software.

Advanced Connectivity and Expansion

Toshiba's **Satellite T2130 Series** offers plenty of room to grow with two stacked PC Card (PCMCIA) slots. Customizing your notebook to suit your individual needs is a snap with over 250 PC Cards available from Toshiba, Noteworthy, and other suppliers. Adding such features as a fax/modem, additional hard drives, network connectivity, and CD-ROM access is easy with simple slide-in cards.

Expansive Memory and Storage

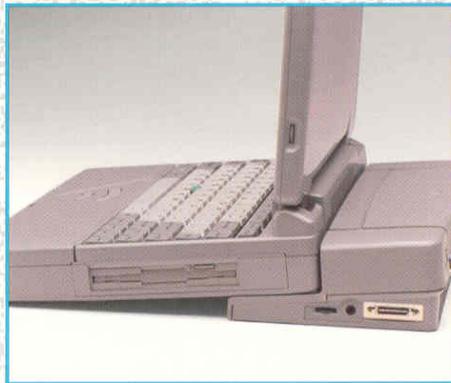

With 8MB RAM standard and a large 520 million byte (=500MB) hard drive, the Toshiba **Satellite T2130 Series** provides plenty of memory and storage for maximum productivity with the flexibility to expand. Configurations include:

Model	RAM	Hard Drive
T2130CS Color dual scan	8MB RAM expandable to 32MB RAM	520 million bytes (=500MB)
T2130CT Color active matrix	8MB RAM expandable to 32MB RAM	520 million bytes (=500MB)

Both models provide enhanced RAM performance through "Fast Page" memory access which allows the computer's memory to work more efficiently. With the help of this feature, expediting memory-intensive tasks is simply a breeze.

The Port Replicator is another example of Toshiba's ingenuity in design.

Connectivity to office peripherals is quick and easy with the optional Port Replicator.

With the new built-in power supply, Toshiba makes it easy to power-up while on the road. No bulky adapters to carry around, just a simple slim power cord.

Choose From Two Brilliant SVGA Displays

Toshiba's **Satellite T2130 Series** offers two brilliant, yet affordable SVGA displays. The T2130CS has a big 10.4-inch dynamic dual scan display with 256-color capability while the T2130CT offers a gorgeous 10.4-inch active matrix display for full color intensity. Both displays are supported by local bus video, advanced graphics acceleration, and 1MB of video RAM. Both models allow you to simultaneously display applications on your notebook screen and an external display, which is ideal for editing and managing meeting presentations. The T2130 Series also features high resolution (1024 x 768) support on an external monitor.

Ultimate Design and Support

Toshiba's **Satellite T2130 Series'** advanced design and customer support makes working on this lightweight portable a pure joy. The keyboard offers a comfortable palm rest and features the easy-to-use AccuPoint™ isometric pointing device.

Both models come with an on-screen "Help Desk" which will answer user's most often asked questions; system control "Hot Keys" for personalizing your system; plus popular software application programs pre-installed.

Toshiba also offers great extras including password security, a keyboard lock, a Kensington® cable lock slot and a one-year limited international warranty.

Toshiba's new **Satellite T2130 Series** notebook computers combine power, expandability and connectivity, all in a sleek design. With Toshiba you get the quality that you have come to expect from the maker of the world's best selling portable computers.

TOSHIBA

Reliability backed by Toshiba. As with all of Toshiba's products, the T2130 Series comes with an impressive warranty and superior support. Our one-year U.S. and International limited warranty can be upgraded to an optional three-year limited warranty for extra peace of mind. Should service ever be necessary, Toshiba has a network of authorized service providers coast-to-coast. We even offer toll-free 24-hour, seven days per week in-warranty technical support and access to Toshiba's Electronic Solutions Bulletin Board on CompuServe.
