TOSHIBA

T3200SXC

The beginning of the end of the desktop era.

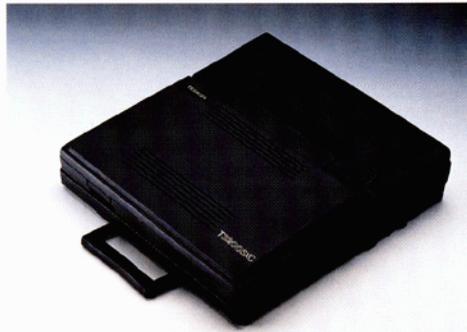

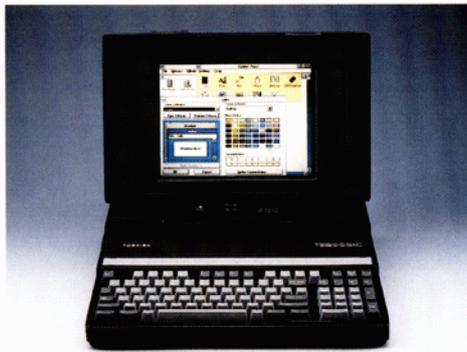

The new Toshiba T3200SXC reaffirms Toshiba's position as a leading innovator in personal computers. Equipped with a revolutionary colour screen technology, 386 power and a whole range of classical Toshiba features, the T3200SXC is the ultimate desktop replacement machine for the trail-blazing professionals of the future.

Experience the colours the future is made of!

The T3200SXC's new, distortion-free TFT colour LCD VGA screen, together with its high speed video controller, represents one of the most significant advances in colour screen technology to date. The result: the T3200SXC's screen is not only more compact and lighter than any CRT screen on the market at present, its image is also brighter and crisper. Full VGA resolution with up to 256 colours displayed simultaneously enables even the most complex images and graphics to be depicted with photographic realism. While in terms of screen speed, the T3200SXC virtually eliminates the time-lag between mouse movements and image modification, representing a massive leap into the future of colour screen technology.

The ultimate in PC perfection for professionals.

Apart from its astonishing colour and graphics capability, the T3200SXC is equipped with a 20 MHz i386 SX processor that literally races through the wide range of sophisticated software you can store on its 120 MB hard disk. In terms of RAM, which comes at a maximum of 13 MB, the T3200SXC is also a front runner, capable of supporting the most advanced operating systems such as UNIX, OS/2 or DOS with Windows 3.0 with ease. In other words, the T3200SXC effectively eliminates the need for top professionals to choose between a desktop or a laptop PC. Add to this the T3200SXC's full-sized keyboard, its sleek, stylish design and its full portability, and you'll understand why professionals who are going places now go to their Toshiba dealer first!
