## T6600C

### Personal Computer

*"It can change to fit my style of working."*

Imagine a mobile computer that can change the way it works to fit the way you work. That can be customised to be your personal productivity device. That's the concept behind the Toshiba T6600C. It's the computer you want it to be. Even one that can turn your thoughts into moving pictures. With its built-in sound and vision, it's the most advanced mobile multimedia system available. There's no other computer quite like it. The T6600C breaks the mould of personal computing. It goes places desktop computers can't and does things notebooks can only aspire to. The T6600C is the power portable that best expresses the Toshiba philosophy of mobile computing: no compromises, no limits. It has the computer power to adapt to your individual needs, yet offers the freedom that has made Toshiba mobile computers the portables of choice.

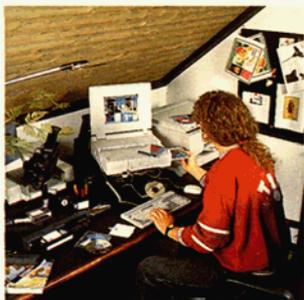

Take it from Toshiba

The 102-key keyboard can be detached and tilted to the perfect typing angle.

### The ultimate Power Portable

The Toshiba T6600C is the Power Portable that can meet even specialist's needs. Just look at the processing power – an Intel 486DX2 with an internal clock speed of 66 MHz, 8 MB memory, expandable up to 40 MB, and a 510 MB hard disk expandable to an unprecedented storage capacity of 1 GB. This is the sort of muscle you'd expect from a high-end desktop, not a portable. The T6600C's expansion capabilities are just as impressive. Two 16-bit full length ISA slots, one Type III PCMCIA 2.0 slot and an internal and external SCSI-2 port make the T6600C the complete connectivity system for today and tomorrow.

### The vision of the future

Multimedia is the next big revolution to hit computing. Yet while most manufacturers are still just planning for it, Toshiba has already integrated it into the T6600C. The T6600C is an ideal mobile multimedia platform for both developers and presenters. The first mobile computer to incorporate internal

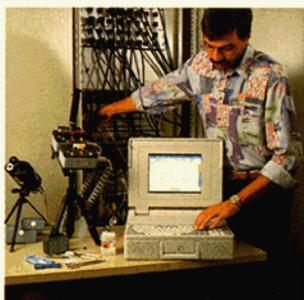

Two full-length ISA slots allow you to use the same cards as in your desktop.

speakers, the T6600C also features an ISA slot for DVI, integrated Microsoft Sound System, a bay for a 5.25" CD-ROM drive, as well as special multimedia connectors inside that allow multimedia applications to be shown on the T6600C's own screen. All of this means unlimited access to the new generation of interactive video applications emerging today. Add to this the T6600C's built-in graphics accelerator and it's hard to picture a more complete visual system.

### Toshiba goes from strength to strength

All of the T6600C's state-of-the-art innovations are backed up with the sort of attention to detail that makes Toshiba the world leader in mobile computers. Like the Toshiba Multi-Safe security system for high-level multi-user security. Or the benefit of external super VGA resolution offering 1024 x 768 pixels with 256 colours. And of course you've always got the confidence that comes from the Toshiba International Warranty, for complete peace of mind worldwide.

Built-in sound, super-fast graphics and optional 5.25" CD-ROM make the T6600C the most advanced mobile multimedia system available.

### Product Specifications

#### Processor

Intel 486DX2, 66 MHz  
8 KB cache on chip, built-in numeric coprocessor

#### Memory

Standard 8 MB RAM, expandable to 40 MB via 2 memory expansion slots

#### Hard Disk

510 MB

#### Diskette Drive

3.5" 1.44 MB / 720 KB  
media-type checking  
12 ms average access time

#### Display

10.4" active matrix TFT colour display

#### External Video Modes

640 x 480 x 256 colours,  
800 x 600 x 256 colours,  
1,024 x 768 x 256 colours  
From a palette of 262,144

#### Keyboard

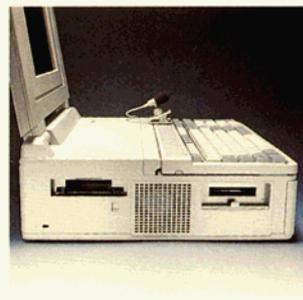

102-key full-size sculptured keys, detachable, can be tilted at 6°, 12 function keys, 8 dedicated cursor keys, separate numeric keys

#### Interfaces

Serial, parallel / FDD port, ext. VGA monitor, PS/2 mouse, PS/2 keyboard, internal multimedia interfaces, SCSI port, audio ports

#### Graphics Adaptor

SVGA compatible,  
640 x 480 x 256 colours  
internal resolution from a palette of 262,144

The card-sized PCMCIA 2.0 slot is the quickest and easiest way to install industry-standard add-ins.

### Expansion

2 x 16-bit, full length ISA expansion slots, 2 x memory card expansion slots, 1 x PCMCIA 2.0 Type III (max. 16 mm) slot, bay for optional 5.25" CD-ROM drive, SCSI HDD (3.5" or 5.25") or other 3.5" or 5.25" SCSI device, standard HDD can be replaced with larger SCSI HDD

### Power Supply

AC-powered, universal voltage, power supply built-in

### Size

390 x 119 x 320 mm  
(15.4" x 4.7" x 12.6")

### Weight

7.8 kg (17.1 lb)

### Bundled Software

Windows 3.1, DOS 6.0, Microsoft sound system, PCMCIA Socket and Card services, screen drivers, all pre-installed on the hard disk

### Bundled Hardware

Logitech mouse, microphone

### Special Features

2 built-in speakers, MultiSafe security system, ext. microphone, Kensington cable lock provision

### Options

5.25" CD-ROM, 4,8 and 16 MB memory cards, DVI multimedia board (third party), Carrying case, Ext. FDD, PCMCIA 2.0 cards (third party)
