In Touch with Tomorrow

TOSHIBA

Take it from Toshiba. High tech alone doesn't make a high class notebook. It takes something extra. And the Tecra 540CDT shows just how much: apart from a 233 MHz Pentium® processor with MMX™ technology, a 4.1 billion byte hard disk, SelectBay modular technology, 20-speed CD-ROM drive and 32–160 MB EDO RAM, it offers the very highest in quality and expansion. It'll make your investment even more secure – and your next visit to a Toshiba dealership even more rewarding.

True flexibility: You can swap the CD-ROM drive, floppy disk drive, second hard disk or an additional battery in seconds thanks to the Toshiba SelectBay.

Get connected: the optional, integrated 33.6 kbps modem turns your notebook into telephone, fax and answering machine.

Simple expansion: turn your notebook into a desktop. With the Desk Station V Plus and the Card Station II it takes just a few seconds.

Remarkable innovation: forget the cable spaghetti, and spare your nerves. Now there's one connection for everything: the Universal Serial Bus (USB).
