In Touch with Tomorrow

TOSHIBA

Take it from Toshiba. Creating a notebook with even more power is one thing. But bringing something completely new to it at the same time is another. Naturally, we aim to do both. With the Tecra 750CDT, the result is a truly remarkable notebook that sets new standards in four dimensions. Our first notebook with a 233 MHz Pentium® processor with MMX™ technology, a 5.1 billion byte hard disk and a 20-speed CD-ROM drive. What's more, it's the first in its class to offer video conferencing and is DVD ready. For further details about our new masterpiece just ask your local Toshiba dealer.

Total flexibility: swap between the bundled CD-ROM and floppy disk drive and the optional hard disk, battery or DVD-ROM in seconds.

Double security: 2 USB ports mean rapid, versatile connections to all your peripherals.

All the options: expanding your notebook environment couldn't be easier, with Desk Station V Plus and Card Station II.

Complete connectivity: an array of new outputs means direct connection to your TV or video recorder.
