## High speed 486DX portability – Toshiba presents the new T6400C

Hanover,  
24th March  
1993

For those who need the fastest computing around, Toshiba has added a new model to its line up of T6400 486-processor based power portable PCs. The latest T6400C model comes only as a colour version – a sign of things to come – and features an Intel 486DX/2 processor running at 50 megahertz. This makes it by far the fastest mobile PC in the Toshiba range.

All other specifications and dimensions of the model are the same as those in the already successful T6400SX and T6400DX versions. The T6400C therefore comes with a 200 MB hard disk, 4 MB of RAM standard (expandable up to 36 MB) and a 10.5 inch TFT colour screen which shows super-VGA 640 x 480 x 256 colour resolution.

"With the market demanding ever faster processing speeds, we felt it was appropriate to upgrade the T6400 series to include a DX/2 model," explained Christoph Selig, European General Manager for PC marketing. "The success of the existing T6400 range however told us that the other specifications are still those customers require. In particular the full-sized industry expansion slot is highly prized for uses which cannot yet be reduced to the PCMCIA 2.0 credit card format", he continued.

The T6400C can also be used as a platform for Toshiba Mobile Multimedia. With a FAST/Toshiba DVI® board and a Toshiba internal CD-ROM drive the T6400C is able to show full colour video on its internal screen. The extra speed of the DX/2 processor is helpful for customers who want to mix standard PC programs and multimedia capabilities in a multitasking environment.

### Product Specifications

#### Processor

- | Intel 486 DX/2™
- | 50 MHz
- | 8 KB cache on chip
- | Numeric data processor included in 486DX™

#### Memory

- | Standard 4 MB RAM
- | Expandable to 36 MB
- | LIM EMS 4.0
- | XMS support

#### Hard disk

- | 200 MB
- | 15 ms ave. access time

#### Diskette Drive

- | Internal 3.5" 1.44 MB /720 KB diskette drive
- | Media-type checking
- | Replaceable with 3.5" CD-ROM drive

#### Display

- | TFT colour LCD
- | 10.4" diagonal
- | 640 x 480 dot resolution

#### Graphics Adapter

- | VGA compatible
- | Up to 256 colours with 640 x 480 dot resolution
- | Over 185,000 colours for the TFT LCD panel

#### Keyboard

- | Detachable
- | 102 full-size sculptured keys
- | Can be tilted at 6°
- | Familiar layout
- | 12 function keys
- | 8 dedicated cursor keys
- | Separate numeric keypad

#### Interfaces

- | 25-pin bi-directional parallel/5.25" FDD port (Centronics compatible)
- | Toshiba 3.5" FDD port
- | 9-pin RS-232C serial port
- | PS/2 mouse port
- | PS/2 keyboard port
- | 150-pin expansion connector
- | 15-pin analogue VGA monitor port
- | Internal multimedia real-time interface with up to 185,000 colours simultaneously on TFT LCD.

#### Expansion

- | Full length 16-bit or half length 8-bit ISA slot
- | Toshiba enhanced communications slot
- | 2 credit card sized memory expansion slots

#### Security

- | Power on password protection

#### Power Supply

- | Auto-sensing 100-240 V AC adaptor for world-wide usage

#### Size

- | 390 x 267 x 103.5 (15.4" x 10.5" x 4.1")

#### Weight

- | 5.9 kg (13.0 lb.)

#### Options

- | Carrying case
- | 2, 4, 8 & 16 MB memory expansion cards
- | External 5.25" 360 KB diskette drive
- | External 3.5" 1.44 MB diskette drive
- | Toshiba ExpressWriter 201 portable printer
- | Key caps for European languages
